CATALOGUE

2014 - 2015

Welcome to the new World of solutions Innovative concepts for advanced treatment!

Dear customer,

With this catalogue, we are pleased to present you a true explosion of innovative and highly-functional new products in our 3 brands – IONTO-COMED, caremore and SÜDA – with excellent price performance.

With the knowledge and expertise of our brand experts combined with many years of experience, we offer you practically oriented and comprehensive designs along with high quality product solutions.

This enables us to provide you trend-setting treatment offers and successes giving you the ability to differentiate yourselves in an ever more demanding market and thus ensuring the sustainability of your business.

Our competent consultant and service team in our international sales and support department is close at hand to assist you at all times and to help you find the ideal solutions for your needs. Profit from the future-oriented product and design solutions of your competent partner with his 3 strong brands.

Kind regards,

Wolfgang O. Franz

Variety of upholstery

Classic padding

10 cm thick, breathable smooth cushion with a foam core and an especially robust, slightly grained surface. Waterproof with moisture-stop and resistant to disinfectants and cleansers.

Wellness padding

10 cm thick, breathable smooth cushion with foam core and an especially soft surface. Waterproof with moisture-stop and resistant to disinfectants and cleansers.

NEW:

Visco-elastic Wellness padding for IONTO WELLITY

Cushion padding

12 cm thick, breathable cushion. Extra soft, thanks to single-chamber core with a special filling. Waterproof with moisture-stop and resistant disinfectants and cleansers.

Contour padding

12 cm thick, breathable and ergonomically formed cushions with a foam core and single-chamber encasement. This mixed cushion technology in connection with the body-contoured seat form guarantees unique seating and lounging comfort. Waterproof with moisture-stop and resistant to disinfectants and cleansers.

Comfortable Features for the IONTO-COMED Treatment Chairs

IONTO-VIBRA-VITAL padding

7 specially formed massage motors arranged in the cushion for wide-area and targeted vibration massages.

6 Auto massage programmes,
3 Wellness programmes as well as
3 Pulse massage programmes selected
quickly via manual switch

with timer function

Give your customers vitality for the entire day with vibration massages!

The IONTO-VIBRA-VITAL massages increase circulation, relieve tension, have a stimulating and refreshing effect and provide mental balance. The cushion offers a comprehensive massage system and makes the multi-functional comfort chairs perfect for wellness treatments. With IONTO-VIBRA-VITAL cushions you can optionally configure all IONTO-RELAX as well as IONTO-XTENSION 5M. Please refer to the respective product descriptions for the exact details.

Variety of Foot Switch

INDIVIDUALLY PROGRAMMABLE!

Ergonomic foot switch

Suitable for cosmetic chairs** without a memory function

From now on, you can easily change the treatment position of your chair even during the preparation intense treatments or oil massages, without interrupting the treatment flow or cleaning your hands. Brief foot pressure suffices.

**IONTO-KOMFORT Xdream, IONTO-KOMFORT Xtension, IONTO-RELAX Chairs

Multifunction foot switch

for cosmetic chairs* with memory function

In certain treatment situations, one would like to have more than two hands: i.e. during a massage, during which you want to correct or adjust the position of the chair. Exactly for these situations, we now offer the perfect solution: Operate all motors and thereby the setting of all treatment positions comfortably using foot pressure. Thanks to a 3-fold MEMORY function, you can individually save your three preferred treatment positions and access them only using foot pressure. *IONTO-KOMFORT Xtension, IONTO-RELAX-Chairs.

Multifunction foot switch

for Chiropody Chair PIONEER

This innovative multi-function foot switch gives you even more freedom during treatments. You operate all functions comfortably and intuitively using foot pressure. In this way, the readjustment of a treatment position is also possible without having to interrupt your work. Especially practical: you can save 3 individual treatment positions with memory saving and access them by pressing the switch.

Ergonomic foot switch

for the Chiropody Chair PODO Xdream 3M

Ergonomic and organised very clearly, you have all adjustment possibilities of your chiropody chair available to you with foot pressure. You can completely devote your hands and your concentration to the treatment.

For fresh design in the cabin

THE NEW COLOR RANGE

With the new color standards for upholstery of treatment chairs and work chairs you have even more ways to give your institute / your cabin a very personal style.

WHITE CEMENT* TERRE* PRUNE* TOMATO* ABSINTHE*

Standard colors for all SÜDA treatment chairs with CLASSIC padding

Standard colors for all IONTO cosmetic treatment chairs with CLASSIC padding

We also recommend the work chairs of the combo system and the work chairs Rodeo and FIT

Combo system work chairs (S.116, Work chairs Rodeo (Item No. 8202.5) and FIT (Item No. 8202.4) please refer to page S.121

If you did not find the right color in the new standard color spectrum, we offer you an additional range of 20 special colors that are available for custom-made orders. The current standard colors of the 2013 catalog – yellow, sapphire, cerise and brandy – remain in the standard range while stocks last and later on will stay available as special color/custom-made order.

WHITE CEMENT* PEARL* TERRE*

The standard colors for all SÜDA treatment chairs with cushion and contour padding.

The standard colors for all IONTO cosmetic treatment chairs with cushion and contour padding.

The standard colors for all IONTO Wellness chairs with cushion and wellness padding.

* Color numbers: terre U13, cement U01, prune U21, tomato U14, U23 absinthe U23 ► Color numbers should be add at the end of the ordered item (e.g. work chair Rodeo, color = Terre 8202.5U13)

Treatment chairs - the basis for successful applications

IONTO-COMED stands for innovative, functional and absolutely reliable treatment chairs with an excellent price vs. performance ratio for over 30 years now.

Our in-house development and production at the manufacturing facility near Leipzig plays an equally important role as the delivery and installation service from our own technically experience service team. Through you, the requirements and wishes of our customers reach our designers directly, are reviewed and can, in many cases, be implemented with short time to market.

IONTO-UNIVERSAL A1 LIEGE

Small and compact for a wide range of applications

Small and compact for any application

The UNIVERSAL A1 is a multifaceted functional talent and is particularly appealing thanks to its space-saving compact form. It can be used in the areas of both cosmetics and chiropody. The height adjustment is achieved electrically via a foot switch, while the back rest and seat angle can be continuously adjusted manually.

The headrest is extendable by 12 cm. Simply take it off and attach it upside down for a comfortable nose gap.

Width, continuously adjustable leg rest and 10 cm extendable foot.

With the perfect flat position this chair is also suitable for massages.

Also suitable for foot care treatments.

More treatment freedom by operation via a multi-functional foot switch

Practically no other treatment chair can offer more professional comfort – perfectly adjusted to each individual customer and the treatments you offer.

IONTO-COMFORT XTENSION

IONTO-KOMFORT Xtension is hard to outdo in terms of functionality and comfort variety. Your customers will experience this as much as you yourself thanks to the exceptional seating comfort. The IONTO-KOMFORT Xtension offers you the maximum amount of professional treatment comfort. Choose from two feature variants: 4M (photo above) and 5M with the unique Xtension function: Seat depth adjustment of up to 10 cm!

- Whole 10 cm additional seat depth 46-56 cm
- A unique advantage of Xtension 5M: Seat depth adjustment for optimum seating comfort for customers of different body sizes.

Whole 10 cm additional seat depth

Up to any size ...

You get a whole 10 cm of additional seat depth by extending the seat cushion.

Adjustment is electrically controlled by using a flip switch on the front of the right arm rest. Your clients can really make themselves comfortable!

The feel-good bed.
IONTO-WELLITY STARLIGHT
 Newly defined comfort for spa and
 cosmetic treatments.

Vertical height adjustment
 ergonomic, elegant, functional.

The raising and lowering of the bed surface is absolutely vertical. This enables you to maintain your position during treatment even if you correct the height of the table. When the height is adjusted, the decorative element is moved up along with the table top and exposes the base of the bed. The base is indented on the longitudinal sides enabling perfect access to the treatment zone. Furthermore the bed also makes a harmonious, compact and very elegant impression even when set to the highest treatment position.

Extendable armrests

The infinitely adjustable armrests can be lowered by up to 15 cm and can also be extended by 12 cm towards the front of the table to ensure that the highest of perfect positioning demands are met effectively.

Uniquely flexible for maximum comfort during treatment.

Steep back positioning

The unusually wide adjustment angle of the seat back ensures an extremely comfortable treatment spectrum: The seat back can be adjusted by up to 70 degrees resulting in an upright position, e.g. for consultations, the application of make-up or treatment of the leg / foot enables. This position provides excellent support and convenient and effortless mounting and dismounting, especially for elderly and handicapped customers

The new, elegantly designed and extremely flexible IONTO-WELLITY STARLIGHT redefines the increased requirements with regard to comprehensive, multi-faceted spa and cosmetic applications with its outstanding features.

Visco-elastic padding

IONTO-WELLITY STARLIGHT offers two types of padding. Moreover, the visco-elastic padding ensures absolutely relaxed seated positions and is appropriate for all manner of treatments thanks to the perfect adaptation to the individual body type.

Legroom all round

The free legroom of 40 cm ensures easy access to the couch even when seated on a chair.

Equipment features

 Maximum weight on seat surface: 180 kg
 Armrest: can be lowered by 15 cm, can be pulled out by up to 12 cm
 Padding width: 85 / 76 cm
 Weight: approximately 130 kg

Couch foot dimension: L 110 cm / W 62 cm
 Minimum seat height: 56 cm
 Maximum seat height: 95 cm
 Back adjustment: 70 °
 Seat angle adjustment: 40 °
 Seat depth adjustment: no
 Foot rest adjustment: 55 °
 Height adjustment: 39 cm
 Head rest adjustment: +15 ° / -45 °
 Supplementary equipment: extendable castors, Colored light module for indirect lighting of the base, Decor for plastic trim

Item No.	Accessories
8301.125	Terry-cloth WELLITY, 5 piece, white, 76 cm
8301.126	Terry-cloth WELLITY, 5 piece, white, 85 cm
8301.159	Soft-velvet terry-cloth WELLITY, 5 piece, white, 76 cm
8301.160	Soft-velvet terry-cloth WELLITY, 5 piece, white, 85 cm

Sophisticated elegance - ergonomically efficient

Elegant trim

The complete full trim ensures that the bed is not only elegant but also very hygienic. The steel parts of the armrests, cushion support and lifting construction are elegant and disguised with robust and easy to clean plastic.

Extendable castors

Smooth-rolling and extendable castors, activated by a lever, facilitate the mobility of the bed.

Customizable design - individual freedom

The standard trim is always in plastic white and can be configured with different side trims. The couch may also be fitted with integrated lighting. Different designs may be possible on request.

IONTO-WELLITY SOUNDMOTION

BALANCE
balance and harmonisation

RELAX
relaxation and regeneration

ENERGIZE
stimulating and energising

Adolescent vitality and resilience, health and satisfaction
Impressive possibilities due to Vibro-Acoustic treatment system

IONTO-WELLITY Soundmotion works with special structure-borne sound converter systems, which are integrated in the lounge chair so that music is applied extensively to the entire body. Thanks to a frequency range of up to about 500 Hz, not only the ear is stimulated, but also the sense of touch. Depending on the frequency, various muscle groups and organ systems are caused to reverberate and the system of epicritic sensibility is stimulated in particular. The individual setting of volume and sound (and therefore vibration) intensity can be comfortably adjusted via control dial directly on the lounge chair. The possibility of connecting the IONTO-WELLITY Soundmotion System to the loudspeakers in the room offers a maximum experience via a "sandwich" sound effect.

Furthermore, the optimal sound package offers a selection of special music titles, which are aligned to the three treatment goals of the systematic vibro cymatic:

-● RELAX relaxation and regeneration,
-● BALANCE balance and harmonisation,
-● ENERGIZE stimulating and energising.

Equipment features of the Vibro-Acoustic treatment system, SOUNDMOTION:

- 8 sound converter with 20 W (PMPO) amplifier each = 160 W (PMPO)
- 2 headphones with 10 W (PMPO) amplifier each = 20 W (PMPO)
- Body zone and headphones separately adjustable via dials

Audio interfaces:

- 1 x 3.5 mm jack stereo input
- 1 x 3.5 mm jack stereo output (connection to headphones, loudspeakers etc.)
- Jack connector cable in white included
- Bluetooth for wireless music streaming

Performance Data:

400 W, 100 – 240 VAC ~47 – 63 Hz

Item No.	Accessories
8171-5001	Sound package with a music selection (Arndt Stein, GEMA free) for 3 application objectives: <ul style="list-style-type: none"> • BALANCE balance and harmonization, • RELAX relaxation and regeneration, • ENERGIZE stimulating and energising
8171.1	Sound Package Plus Tablet Samsung Galaxy Tab 37.0 For comfortable feed-in and control using a tablet. The Sound Package is installed directly on the tablet and can be immediately played. The introduction of the music titles in various genres enables a fast and targeted music selection according to the desired application goal.

First Class comprehensive sound waves treatment system

Healing with sounds and colours is an ancient tradition, for there are few applications, which can lead to such deep, meditative states of relaxation as quickly and effectively as a sound massage can. Together with Alexander Wunsch, the renowned physician and expert in the area of vibration medicine, IONTO-WELLITY Soundmotion has been able to successfully develop a comprehensive soundwave treatment system, which enables the experience of every type of music on the basis of vibro-acoustic full body stimulation.

Stable and comfortable massage bed with electric height adjustment

IONTO-RELAX Massage

Technical data:
 Power supply: 230 V/50-60 Hz

Ideal bed for
cosmetics and
wellness applications

The classic IONTO-RELAX Classic can be optimally adjusted to your individual treatment requirements. Perfectly applicable also for cosmetics applications because of its segmented backrest.

It has a well thought-out design: The reclining leg rest, at only 52 cm wide, gives you a lot of leg room for relaxed working. The low beginning height of 58 cm enables pressure point massages or also footbaths, and the comfortable working height of 89 cm is easy on your back. The 12 cm thick, extra soft and highly flexible pillow cushion gives your customers the wonderful feeling of complete relaxation from the second they sit down to time they stand up again.

Perfectly complemented: Suited to the design of your IONTO-RELAX Classic, the IONTO-COMED offers you the entire range of complementary treatment and furnishing modules.

Unmatched in price and performance –
The IONTO-RELAX Classic

The resting comfort and working ergonomics of the chair are unique.

IONTO-RELAX CLASSIC

THE ORIGINAL

You offer mainly treatments and massages and also want to perform facials?
Then the IONTO-RELAX Classic is the right choice for you.

IONTO-VIBRA-VITAL Massage padding

Give your customers vitality for the entire day with vibration massages!

Scientifically proven.

IONTO-RELAX Balance

Balance – the bed as treatment system

Unique: Balance treats your customers, without having to lift a finger

The unique wellness system BALANCE - an innovative and scientifically-based combination of sound and vibrations in various intensities - enables various types of treatments for you, which you could not offer in this way in a normal treatment facility.

With the already pre-set programmes, you simply use the complex interplay of multi-sensory stimuli at the press of a button for impressive effects with your customers. In this way, you can successfully help customers to reach deep relaxation in the IONTO-RELAX Balance within just a few minutes. Achieving this with common relaxation techniques takes extensive expert competence and above all, more time. Such an application before the actual treatment provides the perfect basis for effective, long-lasting success: regardless whether facial and/or body treatments and massages.

The demands of our customers: Little time – Maximal results

Particularly in our extremely face-paced and stressful times, the Wellness-System BALANCE offers you its UNIQUE, unparalleled offer possibilities:

Pre-programmed treatment processes of 10 to 20 minutes with noticeable success in the areas of stress release, deep relaxation, revitalisation, and harmonisation.

BALANCE opens up the possibility for you to offer short, but nevertheless intensely effective, wellness offerings, which customers can take advantage of with little time. Also even without treatments, BALANCE offers the customer a unique relaxation experience.

The innovative combination of sound and vibrations of BALANCE reaches the customer's desired relaxation entirely without your assistance! The customer can be seated directly in his/her clothing and makes herself/himself comfortable in the IONTO-RELAX Balance. After you have started the programme with the manual control, you can attend to other things since BALANCE TREATS THE CUSTOMER ALL ON ITS OWN!

That means that you can also offer BALANCE treatments when you are already booked for this time slot.

Experience the sound and vibrations in a unique combination.

With the Balance module, select your individual wellness programmes.

The Balance-Module

4 pre-set programmes as well as the combination of sound and vibration can be accessed at the touch of a button. Additionally, during the treatment, you have the possibility to adjust the volume and intensity of the vibrations individually using the remote control. The sound is as flexible as your treatment needs: in addition to the already pre-saved sound programmes, you can connect your MP3-Player via the input dock and import completely individual music.

Based on the well-proven IONTO-WELLNESS BED concept, this bed offers a convincing added-value: 4 pre-stored programs combining sound and vibrations offer a wide spectrum of treatment options.

BALANCE MODULE:

- Electrical connection: 230 V / 50-60 Hz
- Power: 300 W
- Infrasonic drivers: 5 pcs.

Comfortable, hygienic, time-saving
Well-designed covers for oil massages

Ayurveda cover

Essential, especially for ayurvedic treatments. The waterproof cover, made of bielastic plastic material with ultrasound-welded seams, has an all around, fixed boarder, which prevents the liquids from draining unhindered during oil pouring treatments. For the targeted draining of the oil, a groove with a dropping bottle is incorporated into the head area.

8299.740	Oil-resistant protective cover for IONTO-RELAX BED, 5 pieces, width: 76 cm

Selective, indirect colour radiation for targeted, pointed coloured light radiation on the face and small areas of the body.

Colour Lamp – Comfort

Pleasantly warming, comfortable, space-Saving

The IONTO-THERM IR is the optimal source of warmth for body treatments in the aesthetician cabin. It offers customers pleasant warmth during the treatment without having to raise the room temperature. The therapist also profits from this. Whether in connection with body wraps, massages or i.e. the efficacy of current slimming treatments is significantly increased by the infrared radiation. The radiator is fixed to the ceiling to save space and can be easily zoomed to the desired treatment heights via remote control. The ruby red light is pleasant.

Intensifies full-body treatments creates an atmosphere of well-being.

IONTO-THERM IR

Short-wave infrared radiation is emitted via the lamp reflectors homogeneously on the treatment surface. The warmth is dispersed either evenly, or dependent upon the adjustment of the individual radiators between zero and 500 watts.

Technical characteristics of the coloured lamp COMFORT:

- Halogen light is directed to the area on the face or body with a colour filter via a mirror.
- Through the indirect lighting design via the mirror, the respective coloured light impacts the skin without side effects.

- Colour filter in 8 colours (violet, blue, turquoise, green, yellow, orange, red and magenta) included in the price and scope of delivery.
- Convinces with sleek, functional décor.

Technical data:

Electrical connection: 230 V / 50 Hz
 Power: 50 W (Halogen)
 High (without/ with stand): 90 cm/190 cm
 Projection telescopic: approx. 100 cm
 Weight (without/with stand): 5,0 kg / 14 kg

8480	Color light COMFORT, 90 cm high, without stand
Item No.	Accessories
8307.1	Stand for color light
8479.001	Halogen lamp (spare part)
8339.013	Safety goggles

All treatment options can be set and comfortably controlled via the remote control. The large illuminated display shows you them clearly.

IONTO-THERM IR supports the treatment success through:

- Improvement of local blood circulation
- Enhanced active agents absorption e.g. in body packs
- Pleasant heat - no unpleasant cold sensation during full body treatments
- Optimal supplement for MF-current treatments with the IONTO LIFT effect

Technical data:

Connection: 230 V / 50 Hz
 Power: 1.600 W

SYMBIOSIS CONCEPT by IONTO®

The perfect symbiosis of apparative treatment and innovative mask compound ingredients

Versatile - Effective - Fast

The basis: TT-Cellulose active substance mask

Cellulose – The unique mask compound ingredient:

The IONTO-SYMBIOSIS concept uses a natural substance as a carrier for highly concentrated, perfectly balanced active substance concentrates: cellulose. Thanks to its unique characteristics, cellulose is perfectly suited for apparative treatments:

Optimal results thanks to perfect adaptation, like a second skin:

Cellulose has an extremely fine, gel-like structure and adapts to the surface of the skin perfectly, so that the active ingredients can be absorbed evenly and in high concentration.

Fine fibres for optimal infiltration of active substances:

The fibres used for the SYMBIOSIS CONCEPT by IONTO® are made of extremely fine cellulose and have a diameter of 1/1000 of a human hair. Thanks to the network structure, the active ingredients can be optimally transported into the skin.

Not only a carrier substance - The use of cellulose in medicine:

Cellulose is used in medicine as a moist wound dressing due to its high capacity for absorbing and delivering liquids and is highly valued in this area due to its strong healing effect.

Apply, treat, remove –
Using the cellulose mask is so simple

Practical handling for fast work

Every mask is:

- individually packed
- completely pre-cut, incl. pads for the eyes
- pre-soaked in a high-quality active ingredient concentrate
- wrapped in a protective foil to make the application easier

Hygienic and High Purity –
Safety for Aestheticians and Customers

The cellulose used in the SYMBIOSIS CONCEPT by IONTO® is derived from coconut and fermented in an elaborate process. The basis for the later masks is formed, which is cut using laser technology and packaged according to the highest hygiene standards.

Selected Ingredients – Immediately Visible Treatment Results

The TT Cellulose Masks are optimally adjusted to various skin types. There are 30 ml of active ingredient concentrate in each mask, which replaces ampoules.

Simply choose the appropriate mask for your customers:

Sensitive Skin:
Cherry Blossom
 Thanks to carefully chosen ingredients, the Cherry Blossom Mask relieves redness, relaxes stressed skin and gives it moisture.

Problem Skin:
Green Tea
 The Green Tea Mask has antioxidant, detoxifying and calming effects. It combines the anti-inflammatory characteristics of green tea with the wound healing power of camomile.

Dry and Tired Skin:
Deep Sea
 The moisturizing Deep Sea Mask contains SEAWEED EXTRACT and DEEP SEA WATER rich in minerals, which revives and cools the skin.

Moisture Booster:
Hyaluron
 The Hyaluron Mask is the ultimate moisture booster for dry skin. Selected ingredients provide an intense supply of moisture and ideal nourishment. High-dosed HYALURON increases the skin's water binding ability and gives it a fresh and firm look.

First Signs of Skin Aging:
Collagen
 The luxurious Collagen Mask works against the first signs of skin aging. Its regenerating active ingredients, such as high-dosed COLLAGEN, lets skin that is developing the first lines, appear smooth.

Mature Skin:
Caviar Q10
 The Caviar Q10 Mask helps reduce the visible signs of aging, and retains elasticity giving the skin a healthy, younger complexion. In addition to COENZYME Q10, which is an essential source of energy for the skin cells, the Caviar Q10 Mask contains SODIUM ASCORBYL PHOSPHATE, which impedes melanin synthesis.

Sensational effects for the eyes:
Cellulose Eye Mask
 The special revitalizing Cellulose Eye Mask formula supports the reduction of fine lines and helps fade swelling around the eyes. The pads work gently, without irritating sensitive skin. They provide intense moisture penetration, firms the skin around the eyes and increases elasticity. The main active ingredients of the Cellulose Eye Mask are HYALURON and ALGAE EXTRACT.

Optimal Use of Cellulose Masks

The Symbiosis of masks and machine-supported treatment

- 1 Machine-supported work with the cellulose-masks**
 Infiltrates concentrated active substances of the mask and use it simultaneously as a coupling medium.
- 2 Application of the cellulose mask after a machine-supported treatment -**
 Use the multi-functionality of the Cellulose Mask: After an apparative treatment, it acts not only as a high-dosed active substances mask, but also as a wound healing dressing, which stops the excessive trans-epidermal water loss for example, after abrasive treatments.
- 3 Manual application of the Cellulose-Mask**
 Mask and massage in one – save treatment time and treat your customers to an extraordinarily pleasant massage experience.

Optimise the SYMBIOSIS CONCEPT by IONTO®: The appropriate Homecare products

Especially suitable for use at home, we offer TT active substances masks based on the carrier material SILK. These masks contain the same active substances complexes as the Proline Cellulose Masks, however the carrier substance is different. TT Silk Masks are meant to be sold to your customers for use at home. In this way, the successful treatment used in the spa according to the IONTO SYMBIOSIS Concept can be supported sustainably and maintained at a higher level until the next treatment. The high quality TT Silk active ingredients masks are only available to customers of IONTO partner institutes EXCLUSIVELY.

Skin analysis 2.0

High-tech in a compact format

The epidermis is the focus of almost all dermo-cosmetic treatments. A professional skin analysis is necessary in order to achieve optimum results. The better moisture and grease content, pores and wrinkle structure, pigmentation, infiltrates etc. are recognised, the easier it is to optimise the treatment concept in order to achieve maximum results. The technical skin analysis using optical measurement increases the competence and safety of the case history considerably.

- Properties**
- Menu guidance via touchscreen display is possible
 - Integrated measuring sensors in order to determine skin hydration
 - Immediate evaluation of the images by software in the camera
 - Comparison of images with stored images as a guideline
 - Option of creating a customer file and saving the measuring results
 - Graphics overall skin assessment
 - Internet access
 - Data transfer via Bluetooth and USB
 - Screen transfer via WiFi and HDMI
 - Photographic camera with image memory

- Scope of delivery**
- Charging station
 - 2 battery packs
 - USB cable
 - 2 boxes containing sebum paper (each with 50 pieces)
 - Pen

- Technical data:**

8436.2 IONTO-SCOPE APS II 100

8436.1 IONTO-SCOPE APM 100

Cleaning, deep cleansing, brush massage

Treatment device
IONTO-PEEL®

The application of the IONTO-PEEL® device is a „must“ for preparing the skin for the following treatment. Dead skin cells of face and body are removed. The skin absorbs the active agents of the caring preparations much better. Improves the effect of the apparative peeling by the use of cosmetical peeling preparations.

Sponge attachments or goat-hair brush for precleaning, horse-hair brushes for body treatments or for robust body skin. For a deep cleansing perform wet grinding with sponge attachment or dry grinding with a grindstone .

Equipment features

Light-weight handpiece
Proven technology
Constant rpm - even when pressure is applied to the brush
Infinitely adjustable
Extensive line of accessories

Included in delivery:

Device and peel handpiece (Item No. 60139).
Accessories must be ordered separately.

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
Power: 13 VA
Dimensions H/W/D (cm): 7 / 19 / 19
Weight: approx. 1,5 kg
Speed: 20 bis 600 revs/min

8815.8312 IONTO-PEEL® with holder for hand unit

Item No.	Accessories and spare parts
8365	9-piece accessory set for IONTO-PEEL®

Components

8265	Cylindrical goat-hair brush
8361	Sponge holder
8257	Goat-hair brush, Ø 45 mm, for the face
8260	Grindstone, Ø 45 mm, for face and body
8357	Horse-hair brush, Ø 45 mm, for robust body skin
8258	Goat-hair brush, Ø 20 mm, for the face
8358	Horse-hair brush, Ø 20 mm, for robust body skin
8360	Grindstone, Ø 20 mm,
8361.001	Replacement sponges, 1 pack of 10 pieces
8265	Goat-hair cylinder brush, 9 cm high, the „big one“ for the neck and cleavage

Everything in the right place. Practical accessory tray with matching recesses for all the accessories of the accessory kit, including use of the handpiece of IONTO-PEEL® device. Accessories to be ordered separately.

Item No.	Accessories
8266	Horse-hair brush-cylinder, 12 cm high for body treatments
8259	Body plate brush, 60 mm
8800.5	Accessory shelf
9132	Biozym peeling 250 ml

Cleansing and vacuum massage

Treatment device
IONTO-VAC® SPRAY

The suction effect of IONTO-VAC® SPRAY loosens tallow and low-lying infiltrates, transports them to the surface, where they can be removed easily. The produced low underpressure can be used also for the vacuum massage with the help of special accessories. Blood circulation and lymph flow are stimulated when a local suction is created on the skin. After treatment, soothe or refresh the skin simply by using the spray.

Equipment features:

- High vacuum performance
- Double function svaccum and spray
- Multiple use due to extensive line of accessories

Included in delivery:

IONTO-VAC® SPRAY (Item No. 8815.8513 and 8825.8513 respectively) and 2 tubes and filter papers 10 pieces (Item No. 8362.002). Accessories must be ordered separately.

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
 Power: 13 VA
 Dimensions H / W / D (cm): 7 / 19 / 19
 Weight: approx. 1,5 kg
 Vacuum: - 0,5 bar
 Pressure under continuous operation: 2,0 bar

Item No.	Accessories and spare parts
8815.8513	IONTO-VAC® SPRAY with holder for hand unit
32721	Tube, 1,20 m long
8362.002	Filter papers, 1 pack à 10 pieces for adapter
9223.91	Anti-Aging ampule, 10 pieces à 2 ml
9223.92	Hydro-ampule, 10 pieces à 2 ml
9121.6	Almond oil 100 ml
9121.7	Anti-cellulite-oil 100 ml

Item No.	Accessories and spare parts
8366	Accessoy set for IONTO-VAC® SPRAY, 7-pieces
8356	Glass ventouse, small, for removing skin impurities
8256	Glass ventouse, large, for removing larger infiltrates
8456	Glass ventouse, oval, for vacuum massage (for wrinkles)
8264	Vacuum bell, Ø 25 mm, for massage in the neck and cleavage area
8263	Vacuum bell, Ø 45 mm, for massage on the body and back of the neck
8262	Spray bottle, for nebulizing lotions
8362	Adapter, holder for glass ventouses and suction cups

Calm and activate
Vascular training

The heating and cooling function offers a wide application spectrum: Heat can significantly enhance the effect of your products' ingredients. Both heat and cold stimulate metabolism. When only cold is applied, vessels react by briefly narrowing and then intensifying the flow of blood a natural vascular workout.

The IONTO ICE Et HEAT wand offers a unique means of alternating heat and cold treatments, because the wand switches directly from heat to cold and vice versa without pausing. This stimulates the metabolism and allows the skin to absorb active agents more readily.

Treatment device
IONTO-ICE & HEAT

Suitable for
SYMBIOSIS CONCEPT by IONTO®

Equipment features:

- Cold treatment from +5 to +15 °C
- Heat treatment from +20 to +38 °C
- Safety shut-down after 30 min. continuous operation
- Cold and heat treatment with one handpiece

Included in delivery:

Device and ICE&HEAT wand

Technical data:

Modular SL
Electrical connection:: 230 V / 50 - 60 Hz
Power: 30 VA
Dimensions H/W/D (cm): 7 / 19 / 19
Weight: approx. 1,6 kg
Max. output voltage: max. 4 V

8815.8281 IONTO-ICE Et HEAT with holder for hand unit

Item No.	Accessories and spare parts
50222	Replacement ring ICE Et HEAT
9223.91	Anti-Aging ampoules, 10 pieces à 2 ml For incorporation during heat treatment.
9223.92	Hydro ampoules, 10 pieces à 2 ml For incorporation during cold treatment.

Disinfecting blemished skin
Activating and vitalizing of poor circulation, sensitive skin

A HF treatment promotes blood circulation of the skin and has a disinfecting effect. During treatment, the HF wand is placed on the affected area immediately after removing skin impurities; the produced ozone has an optimum disinfecting effect and prevents inflammations. Moreover, it is possible to introduce active agents improvingly into the skin. Simply apply skin care products (without alcohol) and slide over the skin.

Treatment device
IONTO-HF

8273.002

8273.001

8273.003

8273.004

8800.7

Equipment features:

- Low-noise working
- Easy-to-use, secure coupling mechanism for electrodes
- Different electrodes for versatile use

Included in delivery:

Device and HF wand, please order electrodes separately.

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
Power: 10 VA
Dimensions H / W / D (cm): 7 / 19 / 19
Weight: approx. 1,2 kg
Secondary voltage: max. 45 kV

8373.1 IONTO-HF	
Item No.	Accessories and spare parts
8273.002	HF roller electrode
8273.004	HF electrode, open

8273.001	HF electrode, closed
8800.7	HF wand holder, 1 piece

Iontophoresis for introducing active agents
Improvement of cell metabolism deep cleansing by desincrustation

Treatment device
IONTO-GALVANO®

i IONTO-GALVANO® is also suitable for galvanic footbath.

The application of a constant, galvanic direct current (iontophoresis) is based on the finding that ions migrate in a specific direction in a field with a direct current, i.e. always in the direction of the oppositely charged electrode. The IONTO-GALVANO® utilizes this effect in order to take agents that dissociate into ions and drive them into the deeper layers of the skin. The treatment is used for regeneration and improvement of cell metabolism and for introducing special active agents. Moreover, deep cleansing is possible due to desincrustation as well as a galvanic foot bath.

Item No. Accessories

- 1 8267 Tampon electrode & Exanche tampons
- 2 8267.001 Tampon electrode & Exanche tampons
- 3 8268 Sponge electrode
- 4 8361.001 Sponge electrode
- 5 8242 Face electrode
- 6 8242.1 Face electrode (2 pcs)
- 7 8251.5 Counter electrode, 15 x 16 cm
- 8 8241 Counter electrode (small)
- 9 8251 Surface electrode (big)
- 10 8247.2 Counter electrode (2 pcs) incl. sweatband
- 11 9162 Fleece roll
- 12 8228.011 Sweatband (2 pcs)
- 13 8800.8257 Spiral cable set, 4-fold

Recommended basic equipment:

- Item 8242.1 Face electrodes, 1 pair
- Item 8251.5 Counter electrode, 1 piece, 15 x 16 cm
- Item 8800.8257 Spiral cable Set, 8-fold
- Item 9162 Fleece roll, 1 roll of 500 m

Equipment features:

Iontophoresis device for facial and body treatments; efficiently drives active cosmetic agents into the deeper layers of the skin; 0 - 2 mA for facial treatments and 0 - 10 mA for body treatments. Selection of programs for facial and body treatments. Time setting for programming treatment duration. Electronic safety monitoring.

Delivery includes:

Device without accessory. Please order accessory separately!

Technical data:

Electrical connection: 230 V/50 - 60 Hz
Power: 13 VA
Dimensions H/W/D (cm): 7 / 19 / 19
Weight: approx. 1,3 kg
Max. output current: max. 10 mA

8815.8120 IONTO-GALVANO® with holder for hand piece

Included in delivery:
Device without accessories. Accessories to be ordered separately!

Item No. Accessories

- 9223.90 Super-Clean ampoules, 10 pieces à 2ml
- 9223.92 Hydro-ampoules, 10 pieces à 2ml
- 9223.91 Anti-Aging ampoules, 10 pieces à 2ml
- 9022 Active creme 50ml

Apparative lymphatic and micromassage
 Promotion of microcirculation
 For normal to blemished skin and cellulite

Treatment device
IONTO-SKIN® REGULATOR

Suitable for
 SYMBIOSIS CONCEPT. by IONTO®

IONTO-SKIN® REGULATOR Micromassage let your hands slide softly across the face or body of your clients and generate regenerative vibrations with a calming and relaxing effect on skin and muscles. The IONTO-SKIN® REGULATOR has a working range of 5 - 50 Hz, provides a deep tissue massage and is therefore used to promote blood circulation. The micromassage ensures that the tissue is provided with an optimal supply of oxygen and nutrients and that metabolic waste products are removed by an activated lymph flow. The result is an optimal balance between input and output and skin looks healthy and brilliant. Moreover, the muscles are relaxed. In combination with a collagen BIOMATRIX Mask the skin is optimally provided with moisture and active agents t and the skin looks immediately younger and fresher.

Item No.	Accessories
8228.050	Vinyl gloves, size S, 100 pcs.
8228.051	Vinyl gloves, size M, 100 pcs.
8228.052	Vinyl gloves, size L, 100 pcs.
8228.011	Sweat bands, 1 pair, one size, white
8228.007	Holder for the sensomembrane (plastic film)
8228.009	Reusable adhesive electrodes
9147	Body contouring gel, 250ml
8228.100	Spiral cable with push-button (connects adhesive electrode with unit)
8228.101	Wand incl. supply line to the device
8228.003	Disposable adhesive electrodes, 30 pcs.
8228.031	Sensomenbrane, 1 roll, 30 cm length, 30 cm width

Vinyl gloves

Sweat bands

Disposable adhesive electrodes

Reusable adhesive electrodes

Holder for the sensomembrane

Equipment features:

- Working range of 5 - 50 Hz provides a deep tissue massage.
- Double application: Micromassage solo or BIOMATRIX application
- Double effect: activates the flow of lymphs and increases effectiveness of skin care products.

Delivery includes:

Device, wand, vinyl gloves, size S (Item No. 8228.050), adhesive electrodes, 4 pcs. (Item No. 8228.009), sweat bands (Item No.- 8228.011), cable with push button (Item No. 8228.013), wand incl. instruments feed (Item No. 50314), powder (Item No. 8228.005)

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
 Power: 13 VA
 Dimensions H/W/D (cm): 7 / 19 / 19
 Weight: approx. 1,5 kg
 Max. output voltage: max. 600 Vss
 Frequency: 5-50 Hz

8815.8228 IONTO-SKIN® REGULATOR

8409.58 BIOMATRIX concept Starter package

Effective treatment using non-woven substances and micromassages

BIOMATRIX- Concept

STARTER SET
BIOMATRIX Concept

The unique BIOMATRIX Concept is the interaction between BIOMATRIX Masks, micro massages and your hands. The treatment combines wellness and beauty to create a completely extraordinary wellness experience. The BIOMATRIX Masks are made out of collagen, which has an exceptional moisturising effect. The masks are available in four different active agents combinations.

During the treatment, the customer experiences pleasant, gentle vibrations. The facial skin and muscles relax and mimic wrinkles are reduced. The circulation is stimulated, and the tissue receives an optimal supply of oxygen. The active ingredients of the BIOMATRIX Masks are ideally absorbed. Thanks to the activation of the lymph flow, metabolic residues are removed. The skin immediately appears fresher and younger.

BIOMATRIX CONCEPT - 4 easy steps to success

Step 1

Apply the BIOMATRIX Mask According to You Choice

The BIOMATRIX Masks are available in four different active substance combinations. The main ingredient is **collagen**. When applying these masks in combination with a micro massage via the IONTO-SKIN® REGULATOR, the active ingredients are optimally absorbed by the skin.

Step 2

Moistening the Mask

The concentrated power active ingredients of the BIOMATRIX Masks are released when they come in contact with water. Use the BIOMATRIX Water pipette to moisten the mask, Item No. 8228.022.

Step 3

Lay the Senso Membrane over the Biomatrix Mask

The Senso Membrane, Item No. 8228.031, is used in the Biomatrix treatment in order to increase the absorbing capacity of the skin for the nourishing ingredients.

Step 4

The Decisive Kick: The Micro Massage

With the IONTO SKIN REGULATOR
Slide over your customer's skin with your hands and make the skin and muscles vibrate gently.

Scope of delivery:

IONTO-SKIN REGULATOR (Item No. 8815.8228),
BIOMATRIX-masks-set basic, 1 set of each one of the different masks,
incl. sensomembrane (plastic film) and
BIOMATRIX water pipette (Item No. 8228.023)

8409.58 BIOMATRIX Concept
STARTER SET

The stratum corneum, the uppermost layer of the epidermis, provides for many active ingredients applied without support of machines represents an insurmountable barrier. The cosmetic MESO treatment of IONTO-COMED provides this efficient support.

The gentle alternative to injections and Filler treatments

MESO Treatments

Smoothly transports active ingredients into deeper layers of the skin

With a soft padded meso-pad with tiny plastic needles you work the facial skin without applying pressure. The resulting micro-openings in the stratum corneum (horny layer), allow the active ingredients to overcome the skin barrier and enter deeper, more directly and efficiently into the skin.

Stimulation of cell metabolism

The plastic tips exert a stimulus on the skin so that the surrounding cells receive a signal and are stimulated to reproduce.

The success of MESO treatment is various:

- Enhanced absorption of active substances and thereby increased effect of the selected treatment products
- Promotion of local blood circulation
- Increase in cell metabolism
- Improvement of the water binding capacity
- Acceleration and improvement of generation processes.

The MESO treatment offers the best results in the areas of:

Face, neck, cleavage and palm of the hands

Advantages of MESO needle pads:

- Painless, pleasant treatment by 18 tiny needle pads
- The MESO pads are disposable items and individually packed for a safe and hygienic treatment
- They fall into the hand piece and screw them to adapt flexibly to the soft padding facial contours
- Ensures comfortable intaglio adjustment directly at the handpiece
- Each pad has a side opening into which can be fill in a concentrate of active ingredients and incorporated directly during treatment
- Pleasant, very accurate and consistent work by a powerful motor in the handpiece:
This moves the pad about 100 times per second up and down, similar to a punch so that it can be conducted without any pressure on the skin

Smoothly transports active ingredients into deeper layers of the skin

IONTO-MESO SL

Equipment features:

- Meso function for facial and body treatments for introducing active agents by smoothly penetrating the skin barrier.
- Iontophoresis function for facial and body treatments for efficient infiltration of deeper skin layers with active agents.
- easy-to-use, flexible time setting for programming treatment duration, electronic safety monitoring.

Scope of delivery

Device with MESO hand unit,
MESO disposable needle pads (8 pieces)

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
Power: 22 W
Dimensions H/W/D (cm): 7 / 19 / 19
Weight: approx. 1,1 kg

8815.8433	IONTO-MESO SL
Item No.	Accessories and spare parts
8433.101	Disposable needle pads, 8 pieces
8433.120	Anti-Aging Hyaluron, 15 ml
8433.121	Soothing Aftercare, 30 ml
8433.122	Sensitive Exfoliator, 50 ml

Unique effects with the highly innovative treatment combination

IONTO-MESOPhorese

The treatment success is demonstrated by:

- Efficient incorporation of active agents into deeper layers of the skin
- Generation of active agent depot in the skin
- Increased effect of treatment products
- Promotion of local blood circulation
- Acceleration and improvement of regeneration processes.

The IONTO-MESOPhorese is suitable for the treatment of face, cleavage and palm of the hands - for a healthy, radiant and attractive skin. Due to the iontophoresis the active agents, contributed via the MESO function, infiltrate into even deeper skin layers and form an active agent depot there, which the skin can access. Iontophoresis is the usage of the constant galvanic electricity from the realisation that ions travel targeted in a direct current field (always toward the oppositely charged electrode). Thanks to the electrical current, the cell metabolism is improved and regeneration stimulated. Additionally, a desincrustation can be carried out. This serves, in connection with the respective ampoule, to cleanse the upper skin layers.

Preparations

MESOPhorese Sensitive Exfoliator – Gentle peeling as preparatory treatment, based on fruit acid and lactic acid. The special complex of fruit acids removes dead skin cells, leaves the skin soft and refines the pores and the skin appearance.

MESOPhorese Hyaluronic Anti-Aging – Active agent with hyaluronic acid as anti-aging booster for treatments of lines and wrinkles.

MESOPhorese Soothing Aftercare – Calming finishing cream. Dexpanthenol increases elasticity and regulates the moisture content of the skin, supports regeneration and soothes irritations.

Equipment features:

- Meso function for facial treatments for introducing active agents by smoothly penetrating the skin barrier.
- Iontophoresis function for facial and body treatments for efficient infiltration of deeper skin layers with active agents.
- easy-to-use, flexible time setting for programming treatment duration and electronic safety monitoring.
- Easy and flexible, hygienic, secure and sterile-packed disposable MESO pads.

Technical data:

Electrical connection: 230 V ~ / 50-60 Hz
 Power: 35 VA
 Ultrasound frequency: 3 MHz
 Dimensions: 34 x 14 x 22,5 cm
 Weight: approx 2,0 kg

Delivery includes:

- 1 x Device including Meso handpiece (Item No. 8433.200)
- 1 x Disposable needle pads (8 pcs.) (8433.101)
- 1 x Active Agent Anti-Aging Hyaluron (8433.120)
- 1 x Peeling product Sensitive Exfoliator (8433.122)
- 1 x Soothing Aftercare (8433.121)
- 1 x Emulsion 200 ml (9223.900)
- 1 x Anti-Aging ampoules 10 pcs. à 2ml (9223.91)
- 1 x Standard set of electrodes incl. face electrodes (8422.1) counter electrode (8251.5), set of cables (8800.8253), fleece roll (9162)

8433.2	IONTO-MESOPhorese device with Meso handpiece Comfort
8434.2	IONTO-MESOsono
Item No.	Accessories
8433.101	Disposable needle pads 8 pieces
8433.120	Anti Aging Hyaluron, 15ml
8433.121	Soothing Aftercare, 30 ml
8433.122	Sensitive Exfoliator, 50ml
8422.002	SONO contact gel Aloe Vera, 250 ml
8422.016	SONO contact gel Basic, 200 ml
8422.004	SONO contact gel ACE, 200 ml
8422.009	SONO contact gel neutral, 200 ml
8228.082	TT-mask Q10 PROLINE (pack of 10)

Effective anti-aging treatments via the combination of MESO and ultrasound.

IONTO-MESOsono

Suitable for
SYMBIOSIS CONCEPT by IONTO®

Impressive treatment success with depot effect is achieved.

The effect of ultrasound in cosmetics is known for a long time now and is ideal in combination with the innovative treatment technology, MESO, in order to achieve even more effective results.

The effect of the combined treatment technology:

The **MESO Treatment** enables the transportation of active agents deeper into the skin through the skin barrier.

The subsequent **ultrasound** application anchors the active agents deeper in the skin so that a long-term effect ensues. Additionally, the ultrasound stimulates cells, enhances circulation and increases lymph flow.

SONO Ultrasound works with a frequency of 3 MHz and offers both five pre-set programmes, as well as the possibility to save individual treatment programmes. The ultrasound energy can be applied continuously or in pulse mode. The oscillations conveyed by

the ultrasound waves have a positive effect on the micro currents in the skin and the membrane permeability. Additionally, a portion of the absorbed energy is implemented in warmth and thereby promotes microcirculation.

Take care & BEAUTY contact gels or TT-cellulose masks agent as a combined contact and active medium

Equipment features:

- MESO function to smoothly transports active agents into deeper layers of the skin.
- Simple, flexible handling of cosmetic MESO-function, hygienically safe by meso-sterilized disposable pads.
- Ultrasound frequency with 3 MHz
- Ultrasound head 2.5 cm² with ultrasound coupling control, which signals the sufficient contact with the skin
- Easy handling with clear display and logical menu structure
- Indication menu with 5 preset treatment programs and individual settings and storage options

Scope of delivery:

- 1 x 8434 IONTO-MESOsono + 1 x power cable
- 1 x 8433.200 MESO handpiece comfort
- 1 x 8422.005 Ultrasound treatment head 2,5 cm²
- 1 x 8422.009 SONO contact gel Neutral, 200 ml
- 1 x 8433.101 Disposable needle pads, 8 pieces
- 1 x 8433.120 Active ingredient: Anti-Aging Hyaluron, 15 ml
- 1 x 8433.122 Gentle peeling product: Sensitive Exfoliator, 50 ml
- 1 x 8433.121 Aftercare: Soothing Aftercare, 30 ml
- 1 x TT-Mask Q10 PROLINE Item No. 8228.062

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
 Power: 66 W
 Ultrasound frequency: 3 MHz
 Dimensions W/H/D (cm): 34 / 14 / 22,5
 Weight: 3,7 kg

8437.2 IONTO-MESOsono	
Item No.	Accessories
8433.101	Disposable needle pads, 8 pieces
8433.120	Anti-Aging Hyaluron, 15 ml
8433.121	Soothing Aftercare, 30 ml
8433.122	Sensitive Exfoliator, 50 ml
8422.002	SONO contact gel Aloe Vera, 250 ml
8422.016	SONO contact gel Basic, 200 ml
8422.004	SONO contact gel ACE, 200 ml
8422.009	SONO contact gel Neutral, 200 ml
8228.082	TT-Mask Q10 PROLINE (10er Pack)

Highest treatment flexibility through Meso, electroporation and muscular stimulation

IONTO-MESOlift

3 highly efficient technologies in one device

Lifting of facial skin as a result of muscle stimulation as well as infiltration of components for cosmetic meso and electroporation

Cosmetic Meso infiltrates active substances also with bigger molecules after opening the skin mechanically, effectively penetrating into the deep skin layers. Electroporation enables penetration and the maintenance of polarized substances without opening the skin mechanically. Muscle stimulation using MF flow serves to lift and to activate. All three treatment methods, may be combined or used independently.

As with all IONTO MESO+ systems, the IONTO-MESOlift works also with the anti-aging active ingredient hyaluronic acid. **Anti-Aging hyaluron gel** is used in beauty meso treatments and special **hyaluronic ampoules** have been created for electroporation. TIP: Unionized ampoules may also be used in conjunction with care and beauty emulsion for electroporation. Emulsion enables the polarization of active ingredients.

Electroporation

Ionized products infiltrate and anchor by means of electroporation even without opening the skin mechanically. This is an enhancement in the range of treatments skin images previously contraindicated. The galvanic electroporation has also a positive effect on the improvement of local blood circulation, cell metabolism, water-binding capacity of the skin and tissue and the acceleration of regenerative processes.

Muscular stimulation

Medium-frequency is a very pleasant form of electrical stimulation. Unlike conventional treatments, medium-frequency current superimposes the stimulation pulses and leads to pleasant, gentle muscle contractions. For easy operation, two preset programs are available – active and lifting.

This is a highly effective form of massage which enables dynamic treatment with the dual ball electrode. Static treatments use adhesive electrodes to provide simultaneous additional treatment, e.g. on the hands.

Equipment features

MESO-function:

- Simple, flexible handling of cosmetic MESO-function, hygienically safe by meso-sterilized disposable pads.
- Pleasant mesoporation by comfortable adjustment of needles

Electroporation-function:

- Hygienically disinfected and sterilized by rolling paper

MF muscle stimulation:

- Easy handling due to longitudinal and transverse flow through the muscles
- Muscle stimulation statically and dynamically feasible
- Two preset programs for MF facelift and activate

Scope of delivery

- 1 x 8435 IONTO-MESOlift + 1 x power cable
- 1 x 8433.200 MESO handpiece comfort
- 1 x 8435.200 Electroporation handpiece
- 1 x 8435.201 Distribution cable for electroporation
- 1 x 8423.106 Distribution cable 8-fold
- 4 x 8423.105 Connection cable for adhesive electrode black

Microdermabrasion is an effective, modern method of exfoliation, whereby dead skin cells and excess hornification is removed gently with crystals. Using the vacuum function, crystals and dead skin cells are captured hygienically and the tissue is additionally stimulated. In this way, the cell development is stimulated – the skin appears more clear, more fresh and younger. Microderm abrasion is more than just exfoliation, since physiological processes within the skin are supported. Through the stimulation of the fibroblast formation, the skin is firmed and wrinkles reduced. The skin is optimally prepared to absorb active agents after the abrasion.

Successful treat with Microdermabrasion

Abrasion is successfully used in:

- Blemished skin
- Hyper-hornification
- Large-pored skin
- Crinkles / expression lines
- Light-induced skin aging
- Hyperpigmentation
- Superficial scars
- Stretch marks

The treatment success is demonstrated by:

- Improvement of the skin texture, skin looks even and fine-pored
- Stimulation of cell formation
- Alleviation of wrinkles and scars reliefs

Silver Sensitive Care Concept. The skin needs special care before and after the microderm abrasion treatment. With the Silver Sensitive products, we offer you a special skin care concept suitable during microderm abrasion treatments. The patented formula with hemp oil loaded nano-particles with micro silver was developed especially for sensitive, allergy-prone, barrier-damaged skin. The compounds are very well suited to form the natural protective function of the epidermis and to nourish it long-term. The especially high portion of micro silver, in combination with highly active, biological fermentation extracts, supports the restructuring of the skin and reduces their stimulus sensitivity.

Silversensitive Care Concept

Free of preservatives, fragrances, dyes and parabens.

Silversensitive Emulsion

Nourishes the skin after an abrasion treatment and is especially suited for home care during a spa treatment.

Item No. 9135 Silversensitive emulsion, 150 ml

Silversensitive Enzyme Exfoliator

This is an enzyme exfoliator especially developed for the abrasion that does not have to be kept moist.

Item No. 9136 Silversensitive Enzyme Exfoliator, 50 ml

Silversensitive Cream Forte

This is a cream with a high concentration of active ingredients especially suited for use in the spa/institute and is suitable for use after a micro abrasion treatment. Can be used as a mask and day cream.

Item No. 9134 Silversensitive Creme Forte, 50 ml

Abrasion Crystals

The crystals are comprised of aluminium oxide, which cannot be reabsorbed by the body and is therefore anti-allergic. The crystal sand is offered in two grain sizes:

Crystal Sand MACRO

For sensitive, overly callous skin as well as for the treatment of acne scars, and stretch marks.

8239.11 Crystal Sand MACRO 1 kg

Crystal Sand MICRO

For sensitive, atrophic and thin skin.

8239.20 Crystal Sand MICRO 3 kg
8239.2 Crystal Sand MICRO 1 kg

Disposable Eye Pads

The ideal eye protection during an abrasion treatment: Simply glue them over your customer's eyes before beginning the treatment. This way, you protect their eyes safely and without the, often unpleasant, eye protection with an elastic band. The pads can be removed easily and gently, completely without leaving an uncomfortable sticky glue feeling.

Item No. 8239.12 Disposable Eye Pads

Intense peeling using micro crystals sand by manual adjustment Abrasion standard

IONTO-SKIN® ABRASION

Suitable for SYMBIOSIS CONCEPT by IONTO®

Equipment features:

- Manual cleaning function
- Easy to remove old and fresh crystal container
- Setting the vacuum level and amount of crystals on each knob according to skin type and sensitivity of the customer
- Interchangeable glass tip, for sterilization and disinfection suitable

Delivery includes:

Device, Standard handpiece, 2 glass tips; practical handpiece holder; 1 kg crystal sand MICRO, 1 kg Crystal Sand MACRO; 1 pair of disposable eye pads; safety goggles

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
 Power consumption: 90 W
 Vacuum: max. 0.85 bar
 Dimensions H / W / D (mm): 200/190/390
 Weight: 5 kg

8339.1 IONTO-SKIN® ABRASION

Item No.	Accessories
8317.8	COMBI cart W 190 x H 200 x D 390 mm for Ultrasound and IONTO-SKIN ABRASION
8339.003	Glass tip
8339.013	Safety goggles for SKIN ABRASION treatment
8239.20	MICRO crystal sand, 3 kg
8239.2	MICRO crystal sand, 1 kg
8239.11	MACRO crystal sand, 1 kg
8339.001	Air filter for container, 4 pieces Alternating rhythm about every 6 weeks.
8239.12	Disposable eye pads, pack of 50 pairs

Item No.	Accessories
9135	Silversensitive Emulsion, 150 ml
9136	Silversensitive Enzympeeling, 50 ml
9134	Silversensitive Creme Forte, 50 ml

Intense peeling using micro crystals sand with easy handling by electronic device control

IONTO-SKIN® ABRASION COMFORT

Suitable for SYMBIOSIS CONCEPT by IONTO®

Equipment features

- Vacuum and dosage level can be set quickly at the touch of a button.
- Crystal flow and vacuum power can be set to a precise level between 0 and 100 %.
- Values are shown in an easy-to-read display.
- Preprogrammed intensity levels: sensitive, medium or intense for face and body.
- 5 frequently used settings can be stored individually in memory.
- The self-cleaning function can be activated effortlessly at the touch of a button.
- Practical, integrated hand unit holder.
- Container for used and fresh crystals is easy to remove.
- The comfort hand unit lets you tackle skin problems more directly.
- The glass nozzle can be replaced; suitable for sterilization and disinfection

Delivery includes:

Combi-device; Comfort hand unit; Ultrasound head for the face 2,5 cm²; 1 Glass tips, 2 pcs (sterilizable); 1 Glass nozzles 1,5 mm (sterilizable); MICRO crystal sand, 1 kg; MACRO crystal sand, 1 kg
 1 pair of disposable eye pads
 Safety goggles
 1 x SONO contact gel Aloe Vera

Technical data:

Electric connection: 230 V / 50 - 60 Hz
 Power consumption: 100 Watt
 Vacuum ABRASION: max. 0,85 bar
 Dimensions H/W/D (mm): 235 / 345 / 305
 Weight: approx. 10 kg

8330 IONTO-SKIN® ABRASION COMFORT

Item No.	Accessories
8317.8	COMBI cart for MICROABRASION + ULTRASOUND
8339.003	Glass tip
8339.009	Glass nozzle, 1,5 mm
8339.013	Safety goggles for SKIN ABRASION treatment
8239.20	MICRO crystal sand, 3 kg
8239.2	MICRO crystal sand, 1 kg
8239.11	MACRO crystal sand, 1 kg
8339.001	Air filter for container, 4 pieces Alternating rhythm about every 6 weeks.
8239.12	Disposable eye pads, pack of 50 pairs

Item No.	Accessories
9135	Silversensitive Emulsion, 150 ml
9136	Silversensitive Enzympeeling, 50 ml
9134	Silversensitive Creme Forte, 50 ml

The perfect combination for immediate visible treatment success
Microabrasion + Ultrasound

IONTO-SKIN® ABRASION SONO

Microabrasion and ultrasound is THE effective combination in cosmetic special treatment area. By Microabrasion wrinkles / expression lines are immediately visually impaired and refines pores. Therefore, the skin is more receptive to active ingredients. Through the ultrasonic treatment, the active ingredients are anchored and deposited in the skin. The versatile applications of ultrasound, such as lifting or phonophoresis make this combination system an all-rounder for a variety of cosmetic treatment concepts.

Suitable for
SYMBIOSIS CONCEPT by IONTO®

Equipment features

ABRASION

- Crystal flow and vacuum strength can be set manually to a level between 0 and 100%
- Preprogrammed intensity levels: sensitive, medium or intense for face and body
- 5 frequently used settings can be stored individually in the memory
- The self-cleaning function can be activated effortlessly at the touch of a button
- Container for used and fresh crystals is easy to remove
- The glass nozzle and glass peak can be replaced; suitable for sterilization to prevent infection

ULTRASOUND

- 3 MHz = superficial effect and 1 MHz = depth effect
- 21 permanently stored programs, 20 individual memories
- The optical and acoustic coupling control indicates whether there is sufficient contact with the skin
- Ultrasound head for face, 2.5 cm²; ultrasound head 5 cm² for body treatments

Make use of ultrasound with 1 and 3 MHz for:

- Cell regeneration
- Increase in metabolism
- Promotion of the intercellular substance exchange
- Accelerate the lymph circulation
- Improving blood circulation
- Improved absorption of active ingredients
- Increased and sustained effect of treatment products
- Relaxation of the muscles
- Positive effect for blemished skin, rosacea and cellulite

9135	Silversensitive Emulsion, 150 ml

Delivery includes:

- Combi-device; Comfort hand unit; Ultrasound head for the face 2,5 cm²;
- 1 Glass tips, 2 pcs (sterilizable);
- 1 Glass nozzles 1,5 mm (sterilizable)
- MICRO crystal sand, 1 kg
- MACRO crystal sand, 1 kg
- 1 pair of disposable eye pads
- Safety goggles
- 1 x SONO contact gel Aloe Vera

Technische Daten:

- Electric connection: 230 V / 50-60 Hz
- Power consumption: 100 Watt
- Vacuum ABRASION: max. 0,85 bar
- Ultrasound frequency: 1 MHz und 3 MHz
- Dimensions H/W/D (mm): 345 / 400 / 235
- Weight: approx. 14 Kg

Ultrasound has a broad application field within cosmetics. It can be used for micro massages, depending on the frequency, intensity, length or impulse waves, which influences the diffusion of substances through the cell membranes, which service to provide warmth locally or to increase cell processes. For ultrasound applications, not only the effects of the vibrations themselves, but also the infiltrated active agents are important.

Optimal results Ultrasound in cosmetics

Low frequency ultrasound - Intense Hydro Exfoliation

Low frequency ultrasound works at 28 kHz and is transmitted via spade-shaped attachments on the skin.

Intense Hydro Exfoliation

The transmitted vibrations create a dispersion of the applied liquid (water, gel, tonic) whereby the dead horny cells are gently detached and removed. In this way, excellent results can be achieved with i.e. comedone acne. Low frequency ultrasound promotes regeneration, activates, increases circulation and stimulates lymph flow. A treatment with low frequency ultrasound can achieve very good results, especially for atrophic skin in.

Areas of application:

- Wrinkles
- Sagging Skin
- Dry skin,
- Sallow - poor circulation skin,
- Blemished skin,
- Cosmetic acne

28 kHz

IONTO-PEEL® SONO
page 90

High-frequency ultrasound - Versatile in its effectiveness

Via the vertical positioning of the ultrasound head on the skin, the ultrasound waves are transmitted targeted on the tissue that lies beneath it and supports various levels of effects:

1. Mechanical Effect

Deep effect micro massage

2. Thermal Effect

Warming of the tissue so that the circulation, the metabolism and the lymph circulation are activated

3. Biochemical Effect

Stimulation of collagen production

Additionally, the phonophoresis is a further important area affected. Phonophoresis a further important affected area. With phonophoresis, care products (i.e. ampoules) are introduced to the skin with an ultrasound device, whereby a depot effect is achieved.

Possible results with ultrasound:

- Cell regeneration
- Increased metabolism
- Promotion of the intercellular material exchange
- Acceleration of lymph circulation
- Improved blood circulation
- Improved absorption of active ingredients and therefore more intense effects from treatment products

Areas of application:

Wrinkles, sagging tissue, teleangiectasia, facial erythrosis (consultation with a Dermatologist is recommended), fatigued skin, cosmetic acne, several scars, acne scars, stretch marks, cellulite improvement

Depth effect of different frequencies

- 1 MHz to 3 cm
- 3 MHz to 1 cm
- 10 MHz to 0.3 cm

In cosmetics, frequencies of 1.3 or 10 MHz are used. The higher the frequency, the lower the half-value of the ultrasound is and thereby, the effect in the tissue. The lower the depth of penetration, the higher the intensities that can be used, i.e. in the facial area. In this way, more effective, faster results can be achieved.

1, 3 MHz

IONTO-SONO® IMPRESSION
page 91

Unique for Anti-Aging treatments - The immediate effect with extended results

Ultrasound frequencies in the area of 10 MHz are especially suited for anti-aging treatments. The stimulation of fibroblasts forms the basis for the successful ultrasound treatment of wrinkles, as was shown in a multi-centric study (see www.ionto.de/IONTO-SONO effect). The application of the ultrasound with 10 MHz enables a better absorption of the ultrasound energy within the first 2-3 mm in the skin. In this way, optimal results can be achieved, in particular with anti-aging treatments.

Local Dynamic Micro Massage

With this new type of technology, ultrasound waves with frequencies of 1 and 3 MHz as well as 3 and 10 MHz are used. The combined frequencies change up to 500 times per second and thereby create extreme pressure fluctuations on the tissue, in particular on the connective tissue and can thereby improve skin elasticity. The rapid frequency change enables the effect of two ultrasound frequencies in one work process together and additionally leads to a stronger, local micro massage in the tissue - the Local Dynamic Micro Massage (LDM®). The effects that occur as a result cannot be achieved with a conventional ultrasound device.

Especially suited for the treatment of:

- Slacked skin
- Several scars, acne scars
- Skin rejuvenation with the new formation of collagen
- Wrinkles
- Reduction of cellulite
- Body contour improvement

The immediate, clearly visible success already after the first treatment is very convincing, so that long-lasting effective spa treatments are significantly more aggressively accepted and requested by customers. Experience shows that customers often like to come back and actively recommend the treatment to others.

SYMBIOSIS CONCEPT by IONTO®

1, 3, 10 MHz

IONTO-SONO® effect
page 92

Low frequency ultrasound -
Intense Hydro Exfoliation

IONTO-PEEL® SONO

Suitable for
SYMBIOSIS CONCEPT by IONTO®

With pre-installed three treatment programs:

- Cleansing / Scaling
- Lifting Face
- Lifting Body

The IONTO-PEEL® SONO offers two treatment functions:

On moistened skin, the vibrations of the low-frequency ultrasound remove the top layers of dead skin cells and cause an intense hydro exfoliation. On the other hand, the lifting treatment of the IONTO-Peel Sono activates skin cells and promotes the regeneration of the skin. The treatments can be ideally combined. Depending on the size of the area, the vibrations are transmitted to the tissue with a narrow or wide hand piece.

Treatment effects:

- Effective Hydro Exfoliation, particularly suitable for comedonal acne.
- Stimulation of blood circulation and lymphatic flow.
- Activation of metabolism and regeneration, particularly suitable by sagging skin.

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
Power: 10 VA
Dimensions H / W / D (cm): 7/19/19
Weight: 1.6 kg
Output frequency: 28 kHz

The new ultrasound by IONTO for impressive results

IONTO-SONO® IMPRESSION

Suitable for
SYMBIOSIS CONCEPT by IONTO®

Equipment features:

- The device works with 3 MHz = surface effect and 1 MHz = deep-acting effect
- Intuitive and very easy menu navigation
- Very comfortable, large display with 20 pre-set programs
- Possibility to create custom-designed programs
- Integrated sensor indicates if there is sufficient contact to the skin during the treatment and enough contact gel is used
- Ultrasound head for face, 2.5 cm²; ultrasound head with 5 cm² for body treatments

Included in delivery:

Device and ultrasound head for face, 2.5 cm²
1 x SONO contact gel Aloe Vera, 250 ml

Technical data:

Electrical connection: 230 or 110 V / 50 - 60 Hz
Power: max. 2 W/cm²
Power consumption: 43 VA
Ultrasonic frequency: 1 MHz and 3 MHz
Dimensions W / H / D (cm): 38 / 14 / 22,5
Weight: 3,2 kg

Suitable for
SYMBIOSIS CONCEPT by IONTO®

CE
0535
Medizinprodukt

In addition to the traditionally applied sound waves the IONTO-SONO® effect provides with 10 MHz, a concentrated treatment of the upper skin layer.
With the Local Dynamic Micromassage immediate visible effects are achieved with prolonged action.
Take advantage of this optimization of cosmetic ultrasound treatment technology!

- Before-and after-care of plastic and aesthetic surgery
- Skin rejuvenation and tightening
- Wrinkles, sagging skin
- Cosmetic acne, acne scars
- Tightening of connective tissue, cellulite
- Stretch marks
- Some scars

Equipment features:

- 3 ultrasound frequencies: 1, 3 and 10 MHz
- Combination of 3/10 MHz for the facial area
- Combination 1/3 MHz for the body area
- Local Dynamic Micromassage produced by rapid frequency change
- 14 pre-set programs
- 3 ultrasound heads: 1,2 cm², 2,5 cm² and 5 cm²

Delivery includes:

Device, treatment head 1 + 3 MHz / 2,5 cm²,
treatment head 3 + 10 MHz / 1,2 cm²,
SONO contact gel Basic 200 ml

Technical data:

Voltage: 230 V / 50 - 60 Hz
Heads: 1, 3 MHz 2,5 cm²
1, 3 MHz 5,0 cm²
3, 10 MHz 1,2 cm²
Intensities: 1, 3 MHz to 3,0 W/cm²/ 3, 10 MHz to 2,0 W/cm²
Frequencies: 1, 3, 10 MHz
Modes: Continuous
Pulsing 1:2, 1:5, 1:10
LDM 1ms, 2ms, 5ms, 10ms
Weight: 8 kg
Dimensions: 172 / 420 / 270 mm

8432.004	SONO contact gel ACE, 200 ml
8422.002	SONO contact gel Aloe Vera, 250 ml
8422.009	SONO contact gel Neutral, 200 ml
8422.016	SONO contact gel Basic, 200 ml

Current treatments in cosmetics offer reliable results and a wide range of application possibilities. They are pleasant, effective and always individually adjustable to the sensation felt by the customer.

Which types of current are used in cosmetics:

Current (Description)	Frequency (Hz)	Current (Type)
Direct current	0	Galvanic direct current
Low-frequency current	>0 - 1000	Sinusoidal current (et al.)
Mid-frequency current	1000 - 300 000	Interference current (et al.)
High-frequency current	>300 000	Short wave (et al.)

Treatments with Low Frequency Current Micro Massage

What is a Micro Massage?

The micro massage represents a unique form of treatment, which unites manual and apparative work in an unparalleled way. A pulsating electrostatic field is formed between the hands of aesthetician and the person to be treated. This creates a mechanical vibration deep in the tissue of the customer so that rhythmic electrolyte shifts and a pulsating of the tissue ensues. The result: a pleasant deep massage, and the tissue is effectively pumped out. The aesthetician supports the treatment with her hands' massage movements.

Effect:

- During a micro massage, frequencies between 5 and 50 Hz are used. Depending on the frequency, various treatment effects ensue:
- Stimulation of circulation
- Stimulation of the lymph flow
- Treatment of tired, stressed and irritated skin via deep tissue massage
- Treatment of weak connective tissue and the release of tissue hardening
- Firming of the muscles
- Treatment of tear sacs
- Balancing, calming, relaxing, loosening

Treatments with Mid-Frequency Electrical Current Stimulus

What is an Electrical Current Stimulus Treatment:

For a deeply effective treatment, 2 mid-frequency electricity currents are overlaid in the treatment area so that a low frequency modulation is created (interference), and the muscles react with a contraction. With this type of electricity, a vertical as well as a traverse current flow in the tissue ensues, regardless of the continuous form of the muscles. This simplifies the attachment of the electrodes. The muscle activation proceeds evenly and gently and is very pleasant.

Effects:

- Muscle contractions for muscle relaxation or development, depending on the rhythm
- Stimulation of the circulation
- Promotion of lymph flow
- Activation of the metabolism
- Breakdown of fat
- Reduction of cellulite
- Development of connective tissue
- Skin firming
- Smoothing of lines/wrinkles

Healing Effect of the MF-Electricity:

- Promotion of the diffusion processes in the cells
- Inflammation reducing effect via the thinning of inflammatory substances
- Promotion of regeneration

Efficient, safe and have proven, deep-acting effects

Current treatments in cosmetics

How do the different types of currents work in the treatments:

Treatments with direct current Iontophoresis

What is an Iontophoresis?

During iontophoresis, the characteristic of ions is to travel targeted in a direct current field is used in order to channel in existing active substances into the skin in ionic form. Through the tendency to balance various concentrations, the active substance moves from the skin surface to the area of lower concentration, in other words, to the inside of the epidermis. The penetration depth depends on the type of the ion and the length of the treatment and constitutes up to several millimetres: smaller ions travel faster and deeper into the skin. Larger, stationary protein molecules must be channelled longer in order to reach the deeper skin layers.

Effect:

- Penetration of active agents, forming a several days lasting agent depots
- Improving blood circulation
- Improvement of cell metabolism
- Acceleration of regenerative processes
- Improve the water binding capacity of the skin and of the tissue

Direct current

Low frequency

Mid-Frequency

Holistic treatment with medium-frequent stimulation
Anti-aging and bodyshaping in one

IONTO-LIFT® effect

- Iontophoresis for introducing active agents
- Activation of the lymph flow and blood circulation
- Strengthening and toning the muscles
- Smoothing of wrinkles, skin regeneration
- Activation of fat metabolism, cellulite treatment
- Relaxation and rejuvenation, detoxification

The treatment with mid-frequency electricity (MF) is an effective, and for the customer, very pleasant form of electro-stimulation. In contrast to ordinarily known treatments, the mid-frequency electric stimulus is superimposed and enables pleasant, soft muscle contractions. IONTO-LIFT® effect is successfully used in order to prevent the beginning aging process of the facial skin. Connective tissue, muscles and skin on the body are firmed. The relaxing effect of the IONTO-LIFT® effect covers the entire organism. The detoxification and purification processes are activated and the immune system is strengthened. The implementation possibilities of the IONTO-LIFT® effect device are very broad:

- Relaxation of the face musculature
- Stimulation of the skin regeneration
- Consolidation of the tissue, skin tightening and wrinkle reduction
- Streamlining the body contours on abdomen, buttocks, thighs and breasts
- Activation of the lymph flow
- Improvement of the metabolism
- Cellulite treatment
- Directed support of the fat metabolism
- Smoothing the musculature

Equipment features:

- Programmed application concepts for face and body
- Dynamic treatment programs with ball electrode
- For each body region the corresponding electrode
- Easy handling / Positioning of the electrodes by figurative menu navigation
- Treatments with up to 20 electrodes simultaneously (5 outputs)

Technical data:

Electrical supply: 100 - 240 V
Power: 150 W
Output current: 10 x 90mA (at 500 ohms)
Output voltage: 45 V effective
Dimensions W/H/D: 37,5 cm x 17 cm x 26 cm
Weight: 7,5 kg

8423.6	IONTO-LIFT® effect without accessory set
8423.7	IONTO-LIFT® effect incl. accessory set (Item 8423.600)
8423.600	Accessory set IONTO-LIFT® effect

The accessory set IONTO-LIFT effect 8423.600 includes:

- 5 x 8423.107 Distribution cable for 4 electrodes
- 10 x 8423.108 Electrode clip for adhesive electrode, red
- 10 x 8423.109 Electrode clip for adhesive electrode, black
- 2 x 8423.111 Adhesive electrodes, face, 30 pcs.
- 8 x 8423.112 Adhesive electrodes, body, 4 pcs.
- 20 x 8423.110 Rubber electrode, gray, 1 pc.
- 10 x 8423.131 Sponges for rubber electrode, 2 pcs.
- 4 x 8423.121 Elastic strap for rubber electrodes, 100 x 7.5cm, 1 pcs.
- 8 x 8423.120 Elastic strap for rubber electrode, 60 x 7.5 cm, 2 pcs.
- 2 x 8423.152 Double ball electrode
- 1 x 9146 Lifting Gel

Effective anti-aging treatment with long-term effects due to radio frequency waves

IONTO-Lift® RF

- Firming and toning of the connective tissue
- Fat reduction
- Activation of fat metabolism
- Cellulite treatment
- Smoothing of wrinkles
- Activation of the lymph flow and blood circulation

Suitable for
SYMBIOSIS CONCEPT. by IONTO®

Effective anti-aging and body contouring with long-term effect RADIO-FREQUENCY

Treatment options with IONTO-LIFT® RF:
0.9 MHz to 2.7 MHz for a wide range of applications in the face and body area

- IONTO-LIFT® RF has an excellent effect on face, neck, cleavage and arms, for example, for:
- Facial modeling
 - Double chin treatment
 - Jowl treatment
 - Treatment of eye bags
 - Slack arms
 - Improvement of blood circulation

Equipment features

- Frequency between 800 kHz and 2.7 MHz
- Menu navigation using a multi-lingual display
- 14 pre-installed programs for face and body
- Bipolar hand unit for face and smaller areas, Hexapoles hand unit for body treatments
- Individual adjustment and storage options

Delivery includes:

RF device, bipolar hand unit,
RF contact gel with urea

Technical data:

Electrical supply: 100-240 V / 50-60 Hz
Power: 30 W
Dimension W/H/D: 34 / 14 / 22,5 cm
Weight: 3,5 kg

- IONTO-LIFT® RF enables highly effective body treatments with a circumference reduction of up to several centimeters, tissue tightening and body shaping at:
- Cellulite
 - Thighs
 - Hips, stomach, back as well as
 - Reduction of sagging skin after pregnancy, diet or liposuction

care & BEAUTY contact gel with urea is present to overcome the skin resistance at RF treatments. By the addition of urea and a high glycerol content related to excessive drying of the skin is counteracted.

The new BASIC-LINE aroma steamer IONTO-VAPO

IONTO VAPO a powerful, and extremely adaptable steamer of the new IONTO BASIC line. The particular advantage of flexibility: IONTO Vapo is available as a stand-alone version on a space-saving roll-stand and as IONTO Vapo TOWER, a multi-functional combi cart solution.

IONTO-VAPO

IONTO-VAPO TOWER

IONTO-VAPO TOWER
is flexible due to its combi cart version by further treatment systems, such as the IONTO BASIC Line, upgradable to a multi-functional treatment unit. Practical accessories perfectly complement the ergonomic comfort of treatment.

Equipment features IONTO-VAPO

- O³ can be activated
- Duration of steam adjustable
- The volume of steam can be regulated
- Usage of tap water possible
- Temperature control (shut off when no water inside)
- Closed water tank, no sloshing out of the water possible
- Steam pot is closed during the treatment
- Device has an automatic shut off when removing water tank
- Water tank can be decalcified
- Stand with a foot cross (5 casters)
- Stand adjustable in height
- Sturdy base plate with handle for easy locking and positioning of the steamer

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
 Power: 800 W
 Dimension of the steamer without tube H/W/D (cm): 28 / 21 / 26
 Height stand without steamer H (cm): min. 63 / max. 85
 Weight with steamer: approx. 8 kg

8827 IONTO-VAPO

Item No. Accessories and spare parts

- 8829.1 Magnifying lamp holder VAPO
- 8829.2 Magnifying lamp holder VAPO Waldmann
- 8829.3 Storage shelf
- 8829.4 Holder for handpiece PEEL or Ice&Heat
- 8829.5 Holder for multifunctional tray
- 8829.6 Support for special devices
- 8829.7 Shelf for preparations with railing
- 8826.1 Universal handpiece holder modular
- 8826.2 Handpiece holder VAC, plexiglass

Equipment features IONTO-VAPO TOWER

- O³ can be activated
- Duration of steam adjustable
- The volume of steam can be regulated
- Usage of tap water possible
- Temperature control (shut off when no water inside)
- Closed water tank, no sloshing out of the water possible
- Steam pot is closed during the treatment
- Device has an automatic shut off when removing water tank
- Water tank can be decalcified
- Roll car with 4 casters, 2 lockable
- Sturdy and solid to prevent upsetting
- Suitable for adding modular devices and steamer
- Free choice of positioning (constructed for left side)
- Six pin plug connector invisible under the base plate
- Closable wire channels to hide power supply equipment

Technical data:

Electrical connection: 230 V / 50 - 60 Hz
 Dimensions without steamer H/W/D(cm): 755 / 555 / 400
 Weight with steamer: approx. 28kg

COMBO system of work Chairs

Set up your very own chair!

The combi-chair program allows you to compose your customized work chair. Here, you can choose between different seat and backrest shapes, pneumatic springs, foot cross and casters. For the upholstery color choose between 6 colors. If you have a special color request, please contact us. We will be happy to make you an individual offer.

ROUND CHAIR 360
Round seat made of easy-to-clean imitation leather. Revolving seat and backrest. Diameter: 40 cm. Cover made of easy-to-clean imitation leather.

ROUND CHAIR
Round seat made of easy-to-clean imitation leather. Diameter: 40 cm.

SADDLE CHAIR
Ergonomically shaped saddle seat.

BANANA SHAPED REST
The banana shaped rest may be combined with all chair models.

DIAMOND BACK
The diamond back can be chosen for the round and saddle chair (not for round chair 360).

STANDARD PNEUMATIC SPRING In chromium look (left)
Min. seat height: 45,5 cm
Max. seat height: 58 cm

LONG PNEUMATIC SPRING in chromium look
Min. seat height: 53,5 cm
Max. seat height: 72 cm

PLASTIC FOOT CROSS
Diameter: 64,5 cm
Height: 8,4 cm

FOOT CROSS IN CHROMIUM LOOK
Diameter: 67 cm

PLASTIC CASTERS
For hard and soft floors (fig. left)

CASTERS IN CHROMIUM LOOK
For hard and soft floors (fig. right)

Our recommendations

The ergonomically shaped seat and diamond back rest upholstery remains in contact with the back in all movements. Hence, your lower back is always supported.

ROUND CHAIR

Technical data:

- Seat circumference: 40 cm
- Seat height, distance to seat surface and height of the back rest adjustable.

Select between:

- Banana shaped backrest to support the arms, diamond back, no back
- Standard pneumatic spring or long pneumatic spring in chromium look
- Foot cross in plastic or chromium look
- for hard or soft floors: plastic casters or casters in chromium look

SADDLE CHAIR

Technical data:

- Seat circumference: 40 cm
- Seat height, distance to seat and height of backrest can be adjusted.

Select between:

- Banana shaped rest to support the arms, diamond back, no back
- Standard pneumatic spring or long pneumatic spring in chromium look
- Foot cross in plastic or chromium look
- for hard and soft floors: plastic casters or casters in chromium look

As the saying suggests – securely in the saddle– the saddle shape promotes correct upright sitting posture and the blood circulation in your feet.

ROUND CHAIR 360

Rotatable seat with revolving backrest for supporting the arms in difficult or tiresome work (available only with banana shaped rest)

Technical data:

- Seat circumference: 40 cm
- Seat height, distance to seat surface and height of the backrest adjustable

Select between:

- Standard pneumatic spring or long pneumatic spring in chromium look
- Foot cross in plastic or chromium look
- for hard or soft floors: plastic casters or casters in chromium look

The back rest can serve as arm rest for difficult or longer work. Flexible adjustment to your favourite seating position.

Magnifying lamps

Magnifying lamp MAGIC / LED MAGIC

Available in two versions:

- with ring-fluorescent tube
- 54-piece LED ring lights concept

Equipment features:

- Magnifying glass strength 3.0 diopters each
- Provides comfortable warm-white light
- Very elegant, light magnifying lamp head
- Diameter of ring light tube only 15 mm
- LED: high light output with maximum energy efficiency
- 13 mm pin for insertion into magnifying lamps fixtures

Technical data:

Electrical connection:	230 - 240 V / 50 Hz
Power MAGIC:	56-pc. LED light 5 W
Power LED MAGIC:	T4 22 W fluorescent light
Magnifying glass strength:	3 diopters
Diameter of magnifying glass:	127 mm
Length of lamp head:	260 mm
Length of lamp arm:	900 mm
Weight:	approx. 2,5 kg

8206.34 Magnifying lamp MAGIC

8206.35 Magnifying lamp LED MAGIC

Magnifying lamp STANDARD

Equipment features:

- Lamp with covered spring joint arm
- Metal, painted white
- Glass lens
- Visor
- 13 mm pin for insertion into magnifying lamps fixtures

Technische Daten:

Electrical connection:	230 V / 50 Hz
Power:	22 Watt
Magnifying glass strength:	3,0 diopters
Diameter of magnifying glass:	125 mm
Diameter of magnifying head:	265 mm
Length of lamp arm:	approx. 1.040 mm
Weight:	approx. 4,3 kg

8206 Magnifying lamp STANDARD

Magnifying lamp CIRCLE

With magnifying lamp head made of aluminum

- Flicker-free light for fatigue-free work
- Low heat development through cold-light-ring tube
- High flexibility through a completely redesigned lamp arm
- 2 handles for easy pulling of the lamp head in the correct working position, suitable for right and left handers.
- Sturdy technology, designed for the constant stress in professional use
- Safety cover
- Rugged aluminum housing

Note:

This cold light magnifying lamp can be upgraded by replacing the bulb with daylight tube (Item No. 8407.1) to a daylight lamp.

Technical data:

Electrical connection:	230 V / 50 - 60 Hz
Power:	24 Watt cold light
Magnifying glass strength:	3,5 diopters
Diameter of magnifying glass:	165 mm
Diameter of magnifying head:	270 mm
Length of lamp arm:	approx. 1040 mm
Weight:	approx. 3,6 kg

- Magnifying glass attachment included
- 13 mm pin for insertion into magnifying lamps fixtures

8206.71 Magnifying lamp „CIRCLE“, white/gray

Pedicure chair AF1

Compact, functional,
comfortable, semi-automatic

The small compact at a great price

The AF1 is an all-rounder and points with its space-saving compact design. The height is adjusted electrically by using a foot switch, back and seat angle can be manually varied continuously. Due to its flat absolute position the AF1 is also suitable for massage services.

The headrest is extendable by 12 cm. For massage, it is turned, plugged in and so makes a comfortable nose slit.

The translucent foot scooner provide hygienic protection.

Equipment features:

- Comfortable upholstery
- Comfortable access due to movable armrests and lowering of seat height to just 51 cm.
- Electric motor for infinite adjustment of seat height using a foot pedal
- Chair angle mechanically adjustable
- Base with 4 stable, rotating casters for moving or adjusting the chair
- Two-part leg support with infinite adjustment, individually adaptable angles and extendable footrests
- Hydraulic adjustment of backrest using a foot pedal, headrest extendable
- Foam-padded seat with easy-to-clean plastic cover.

A foot pressure - 5 motors in action

- Height adjustment
- Seat tilt
- Backrest adjustment
- Leg rest adjustment left
- Leg rest adjustment right

Leg supports remain in the fully automatic 5-engined version laterally rotatable.

Per foot switch **directly in the perfect treatment position**. Set each motor comfortable and individually by foot switch or move thanks to the memory function with only one foot print 5 motors simultaneously to the desired treatment position.

5 motors for increased comfort during treatment

PIONEER 5M

With the new, fully electrical version the PIONEER offers more comfortable conditions for concentrated and effective treatment.

The multifunctional pedicure chair PIONEER now has even more power for maximum comfort and perfect efficiency during treatment.

With the new, 5-engined design, it is possible to set all positions fully automatically using the multi-function foot switch: A convenient 3-way memory function drives your PIONEER with only one foot print completely in the treatment position you saved. And the best part: the leg rests remain also in the fully automatic 5-motors version laterally rotatable.

Wide range of applications and more TOP-treatment comfort

A tradition of innovation

SÜDA is probably the oldest and most traditional footcare brand when it comes to machine-supported treatment technology.

The company SÜDA was known in the 20s as a leading manufacturer of shaft grinder motors in the jewelry industry. Many decades ago they developed the first device for the podiatry without and then with integrated suction (dry technique). In the development and introduction of the first wet technology unit SÜDA took as an innovative company in cooperation with partners a leading role.

Committed to this tradition, SÜDA constantly working on innovative solutions across the spectrum of machine-supported pedicure and podiatry.

PROFESSIONAL LINE and MEDICAL LINE

The footcare expertise provides you with products and service, precisely adapted to your requirements and needs.

The SÜDA competence lines for foot care and podiatry.

Proven suction technology with new standards - optimized for each requirement

THE PEDO SPRINT SERIES silentpower

With the proven PEDO SPRINT SP series, we offer you three systems for different demands. All three devices are based on the successful PEDO SPRINT technology that we have now optimized and developed further:

- **Powerful:** New, more powerful micro motor for maximum torque power in the lower (25,000 U / min) and the upper speed range (40,000 U / min)
- **Strong suction:** With 600 watts to 180 l / min
- **Pleasantly quiet:** 53 dBA (at 20%) up to max. 60 dBA (at 100%)
- **Lightweight:** with 3 kg Product weight also perfect for mobile use
- **Practical:** Fast, easy to change the dust bag and dust filter
- Double filter system coarse and fine filters protect the air outlet effectively and prevent the escape of fine dust.
- Integrated handpiece holder

- **Flexible:** Instant exchange of collets transmission

1. Unscrew the handpiece cover 2. Unscrew collet chuck 3. Screw the new collets chuck, screw the cover. Ready!

TIP: Collets chuck change in a matter of minutes even saves lost work time and costs

The performance of turbo PEDO-SPRINT-series silent power: antismell - audible quieter - noticeably more power

The use of an activated carbon filter in the silentpower-systems neutralizes unpleasant odours. This innovation contributes a lot to a hygienic pleasant treatment atmosphere.

Devices in silentpower design with an extremely low noise level up to a maximum of 60 db are significantly quieter than comparable devices. This offers noticeably more comfort to you and your clients.

With significantly higher torque, silentpower-systems permit the highest level of reliability also in demanding treatments. Especially in the lower speed range, the hand unit proves extremely reliable, also in treatments where pressure is applied.

With the **ECO PEDO Sprint** in the Sprint series, we meet the demand for a **simple and powerful** foot care system. This system is characterized by the ingeniously simple in operation and a sensational price-performance ratio.

PEDO Sprint ECO silentpower

Ingeniously simple handling - sensational pricing

Handpiece:	Ø 23,5 mm 119 g (340 g incl. hose connection) Length 134 mm

Delivery includes:

PEDO Sprint 50 SP footcare appliance with handpiece
Pack of 45 dust bags (Item. No. 8415.2)

1945	PEDO Sprint 50 SP
Item No.	Accessories
8921	Podiatry case „PSmobil“
1630	Podiatry case „SMARTCASE“
8913.12	Podiatry case „MINIPRAX“
8913.78	Podiatry case „DAS RAUMWUNDER“
8211.024	Foot switch
8336	Handtool holder
8415.2	Micropore dust bags (pack of 5 pcs)
8340.001	Collet chuck gear
35600	Gear box silentpower
35277.3	Suction sleeve gray, (super slim)

PEDO Sprint 100 silentpower

Extremely high-torque all-rounder with 40,000 U/min, especially designed for higher speeds.

Clear layout due to LCD display

The „intelligent“ electronics has timely attention to maintenance appointments and remind you when a dust bag and filter change is due. All important operating parameters such as suction, speed, direction of rotation, maintenance and repair are indicated on a large LCD display.

Ø 19 mm
Art. 8340.003

Ø 13 mm
Art. 8340.004

Handle sleeves in slim shape for difficult work on small areas.

Mini hand piece for maximum comfort

Small 16 mm drive motor. Proven centrifugal tension for easy, fast cutter changes. ON/OFF button directly on the handpiece.

Technical data PEDO Sprint 100 SP:

Speed:	6.000 - 40.000
Handling:	Key buttons, large digital display of suction power, speed, direction and maintenance / repair indication
Memory function:	3 memory functions
Handpiece right and left running:	Yes
Pause funktion:	Yes, over micro switch handpiece and/or using a foot switch
Noise level:	at 100% suction performance 60 dBA at 20% suction performance 53 dBA
Weight (without handpiece):	3 kg
Dimensions (cm):	W 22 x D 18 x H 14
Suction performance max.:	180 l/min
Handpiece:	Ø 25 mm 141 g (365 g incl. hose connection) Length 130 mm

Delivery includes:

PEDO Sprint 100 SP footcare appliance with handpiece
Pack of 45 dust bags (Item. No. 8415.2)

8340.004	Suction sleeve gray, (super slim)

Power for demanding professionals

MEDIVAC

The new Medivac sets standards in the dry technique. With its outstanding characteristics in performance and comfort as well as its innovative design, it offers plenty of comfortable functionality.

Medivac 25 – The extra plus of torque in the lower speed range
Special micromotor with max. 25.000 rev / min. for very high torque in the lower speed range.

Medivac 40 – All-round talent for all applications
Micromotor with max. 40.000 rev / min., especially constructed for higher speeds.

Strong suction suction 200 l / min.
Powerful new, stronger micromotor in two special versions for maximum torque in the lower (25,000 U / min.) Or the upper speed range (40,000 U / min.)
Whisper-quiet 55 dBA maximum at full suction
Sustained power more torque in the lower speed range
Low maintenance suction motor with low wear

Mini Handpiece

one of the smallest on the market with on-/off button

Hygienic

Easy cleaning of the handpiece

Innovative

Micro filter bags with internal support structure for consistent suction power

Easy

Dust bag and filter change in a breath

Odorless

Activated carbon filter neutralises odors

Wireless

Wireless foot switch technology for wireless, flexible handling

Clear

Graphical, self-explanatory display with high resolution

Memory

3 memory functions for common speed and suction setting

Handpiece advantage

The small, ergonomically shaped and lightweight precision handpiece with push button switch has a powerful and low vibration micromotor. In addition, the ON / OFF button on the handpiece allows a fast and secure cutter change during treatment.

Functional advantage

A particular advantage for professional and efficient work is the 3-MEMORY function of the medivac. Here you can save three of your most commonly used speed settings in combination with an appropriate extraction and with only one keypress.

Overview advantage

The large, clear display shows all information in easily understandable symbols, such as suction stages, speed handpiece, speed-related cutter recommendation, filter-level etc.

Practical advantage

High quality wireless footswitch technology within seconds of the foot switch is coupled to the device and by special coding almost radio interference resistant. Due to low-energy technology, you can work up to 5 years without a battery change it.

Inflow

Increased inflow, results in a higher flow rate.

Filter attachment

The internal filter bag frame provides optimal position of the filter bag inside the device. Optimum flow of all interior surfaces of the filter bag. Therefore, the potential of the filter cloth is fully utilized. The support structure prevents the suction power of the unit throughout the filling time.

Antibacterial effect

Cruciate ligament woven textured three-layer depth filter. Binding and thus preventing the proliferation of bacteria in tiny micropores. Conforms to testing standards of the BIA/IFA and the dust class M.

Innovative construction

The new shape of the micro-filter bag allows the passage of air interspersed with dust on the shortest way. The dust is bound by the filter cloth and the coarse dust can fall down in the filter bag. Thus, the suction pressure remains consistently high.

And now very individual:

e.g. BLACK

e.g. LEOPARD

e.g. RASPBERRY RED

Choose the powerful Medivac optional in the appropriate color to your practice facilities - whether high gloss or mat or even in an individual decor*.

- Special paint (high gloss or mat), extra charge € 100, -
- Special decoration (foil coating), extra charge € 200, -

* On request and taking into account the technical feasibility.

NOVELTIES

Innovations

2 powerful SÜDA VAC systems - one smart treatment unit

duoVAC

The new duoVAC is the perfect combination of two powerful and independent suction technology systems integrated in an attractive cabinet. The suction systems integrated in the duoVAC correspond to the latest stage of development and unite all the benefits of the SÜDA VAC range (pedoVAC, mediVAC): Thus, you profit, for example, from light, easy to hold handpiece/micromotors as well as strong suction performance with minimum motor noise.

LEFT

System for coarse callus treatment and cutting work, in particular, in low revolution ranges with particular traction force up to 25,000 rpm.

RIGHT

System for fine, filigree work/fissure work, primarily in high revolution ranges up to 40,000 rpm.

Both sides with magnifying light holder large easy running castors

High quality and easy to clean: The specially coated glass cover plate

Small, lightweight precision handpieces with push-button

Upper draw with folding front

Optional UV compartment

Convenient hose lengths of 1.5 m each

Easy access thanks to side flaps

High lower drawer

large smooth running rollers

Optional with wireless foot switch

Hinged front for additional storage space

Pull-out handpiece holders

Your handle selection: EASY open or recessed shell Display with foil keyboard

STRONG IN DESIGN AND PERFORMANCE

THE NEW COMPACT CLASS SÜDA

The new treatment units of SÜDA combine powerful functionality with unique design and therefore fulfil the highest demands.

High quality materials and processing technologies, combined with thoughtful design solutions make any new treatment units - whether equipped with dry technique, wet technique or compressed air systems - the highlight of your practice. Closed a chic design furniture, opened a multi-functional, powerful and ergonomic work station.

Treatment unit duoVAC = 2 suction systems

Powerful technology

- Mini Handpiece** One of the smallest on the market with on-/off push-button
- Hygienic** Easy cleaning of the hand piece
- Simply** Dust bag / filter change in a breath
- Odorless** Activated carbon filter neutralises odors
- Wireless** Wireless foot switch technology for wireless, flexible operation
- Clearly** graphical, self-explanatory display in high resolution
- Memory** 3 memory functions for frequent speed and suction setting

Functional SLIM LINE design

The attractive cabinet unit offers 4 practical drawers with different additional benefits.:

- The top drawer has, for example, a fold down front which creates an additional shelf for tools etc.
- The centre section has an optionally available UV compartment which corresponds to the new, efficient all-over system from SÜDA.
- The bottom drawer is taller than the others making it ideal for bottles (e.g. disinfection).

Scope of delivery (basic model):

2 suction technology systems, Cabinet body in white with 3 drawers, 1 fold down compartment at the top, recessed shell handles, castors 2 holders for magnifying lights, standard

Mini handpiece with on and off button

Easy dust bag change over the side flap

High quality durable glass cover plate with double-sided magnifying lamp holder

Item No.	Accessories
1995.6	Add-on kit for radio foot switch Medivac
8415.2	Micro-dust bags, 1 pack containing 5 pieces
1995.003	Medivac collet chuck

Treatment unit unoVAC = 1 suction system

The compact and functional cabinet system is also available with just one integrated suction system, both up to 40,000 rpm or up to 25,000 rpm. When it comes to the unoVAC, you can choose whether you want the suction motor/handpiece on the left or the right side of the unit. The free flap on the opposite side of the cabinet unit can then be used as additional storage space. The unoVAC thus also offers the advantages of the new treatment unit: Treatment system + Shelf space + Storage space - ergonomic, space-saving, hygienic and attractively compact. In addition: If need be, you can update your unoVAC with a second suction system and create a duoVAC. Talk to us; we would be happy to advise you.

Demand via buttons: 3-MEMORY function to store your three most frequently used speed and suction power settings

The large, clear display shows all messages in easily understandable symbols, such as suction level, speed, handpiece, speed-related cutter recommendation, filter-level etc.

Scope of delivery (basic model):

1 suction technology system, cabinet body in white with 3 drawers, 1 fold down compartment at the top, recessed shell handles, castors 2 holders for magnifying lights, standard

* Upgrading of a unoVAC cabinet system to include a further suction system is possible; to do this, the cabinet must be sent to the factory.

Accessories dry technology

Micro-pore dust bags for AIR AS1/PEDO FS3

Item No.
8412.1 1 pack of 5 pcs

Dust bags suitable for foot care devices AIR AS1/PEDO FS3. Through the five-layered special fabric with ultrasonically welded seams best filter properties are guaranteed.

Micro dust bags for PEDO Sprint

Item No.
8415.2 1 pack of 5 pcs

Dust bags suitable for foot care devices PEDO Sprint 100/50/ECO. Through the five-layered special fabric with ultrasonically welded seams best filter properties are guaranteed.

Dust bags for Profi Master

Item No.
1400.005 1 pack of 10 pcs

Suitable for footcare device Profi Master.

Dust bags for T 500

Item No.
1490.001 1 pack of 10 pcs

Suitable for footcare device T 500

Dust bags TWIN UNIT

Item No.
1210.002

Through the five-layered special fabric with ultrasonically welded seams best filter properties are guaranteed. Suitable for all TWIN UNIT versions.

MEDIVAC Dust bags

Item No.
1995.001 dust bags micropore MEDIVAC, 6 pcs

The textured, multi-layered depth filter by IFA. Microfine fabric filter with maximum dust deposition quality (in D), to dust class M. Minimal loss of suction. Antibacterial effect.

Handpiece holder universal

Item No.
8920.102

Additional handpiece holder made of durable soft plastic. Absolutely non-slip and washable for safe working on all work surfaces.

Foot switch wet and dry technology

Foot switch

Ideal for Combi cabinet TWIN UNIT (Item No. 1212), as well as the wet technology podiatric device Waterspray 6000 (Item No. 1530).

Item No. 8211.024

Foot switch

Ideal for Combi cabinet TWIN UNIT (Item No. 1212), as well as the wet technology podiatric device Waterspray 6000 (Item No. 1530).

Item No. 1210.001

Add-on set wireless foot switch

High-quality radio technology guarantees connection to the appliance within seconds, by means of special coding that is virtually resistant to radio interference. Up to 5 years use without changing the battery. Suitable for MEDIVAC, unoVAC and duoVAC systems.

Item No. 1995.6

Accessories wet technology

Aqua Destillata

Distilled water. Demineralized water according to VDE 0510 is indispensable for smooth work with appliances for wet technology.

Item No. 8334.007 5 L canister

Podo-Liquid

Special solution, containing alcohol, which is used in wet technology devices instead of distilled waters. It breaks the surface tension of the water and thus facilitates an effective fogging on the tip of the hand tool.

Item No. 8334.001 5 L canister

CARE&CLEAN NT-Spezial

Non-alcoholic, odour-neutral germicidal concentrate to improve surface tension and durability of distilled water. Mix content of bottle with 5l of distilled water.

Item No. 9320.600 100 ml

STERIA Spray

Your high-quality hand piece needs regular care; once daily when used normally and several times a day when used more frequently. Rinse it through thoroughly with STERIA spray – the hand piece will reward you with a long lifespan. A separate nozzle can be ordered if necessary.

Item No.

1389.9 500 ml can

1389.2 Nozzle

1389.6 Nozzle for turbinen

Compact – low-priced – efficient

ASTERIA 1000

The new wet technology system ASTERIA 1000 offers plenty of power at an unbelievable price. This could be achieved thanks to new, innovative, optimized technology of the handpieces. The ideal device for starting wet technology or the perfect second device for your institute.

Podiatry case „ASmobil“

Features ASTERIA 1000:

- 30.000 rpm
- Fine spray, also when distilled water is used
- Easy-removable water tank
- clearly arranged control panel. ASTERIA 1000 is the ideal system for an entrance into the wet technique, or the perfect second machine for your office or mobile use.
- fits all cases of the PEDO Sprint line

Technical data:

Current: 230 V alternating current / 50 - 60 Hz
 Number of revs: 8.000 - 30.000 rpm
 Weight: 3,5 kg
 Dimensions (cm): W 22 x D 18 x H 14

Features „ASmobil“:

- Dimensions (cm): H 39,5 x W 48 x D 16,5
- Weight: 5,5 kg

High performance wet technology for the professional footcare.

PEDOSPRAY NT 40

Powerful wet-technology appliance, combining the success of the „PEDOSPRAY NT 40“ optionally available with a newly developed hand-held light.

Podiatry case „NTmobil“

Features for PEDOSPRAY NT 40:

- NSK handpiece (Art. No. 1500.2) with the latest generation of brush-free micromotor, virtually wear-free, and no further carbon replacement necessary.
- Quiet operation; high performance even at slower speeds.
- Optional: Tip of the handpiece fitted with LED light halo for illuminating the working area (can also be disabled).
- Individual spray regulation.
- Right/left operation.
- Foot switch attachment (Item No. 8211.021).
- Keyboard with hygienic membrane coating.
- Well suitable for mobile podiatry (case not included in delivery of the appliance).

Features „NTmobil“:

- Dimensions (cm): H 39,5 x W 48 x D 16,5
- Weight: 5,5 kg

8924 Podiatry case „NTmobil“ for Für PEDOSPRAY NT 40 and NT 40 light

Technical data:

Connected load: 230 V alternating current , 50 Hz
 Speed: 8.000 - 40.000 rotations per minute, infinitely variable
 Weight: approx. 3,2 kg
 Dimensions (cm): D 25 x W 25 x H 8

SÜDATRONIC series

Comfort

Handpiece tip and micromotor separable
 OMNISCUT-Attachment possible
 Autoclavable handpiece tip

SÜDATRONIC Comfort

The short and more comfortable Profi-Line handpiece PX65 in conjunction with the NBX micromotor is characterized by its load capacity. Both components are perfectly suitable for continuous working.

Equipment features:

Item No. 1530.6 in **Comfort version**, with PX65 Profi-Line handpiece as well as NBX micromotor for particularly demanding tasks

Technical data:

Connected load: 230 V alternating current, 50 Hz
 Speed: 5.000 - 40.000 rotations per minute,
 infinitely variable
 Weight: 4 kg (incl. handpieces)
 Dimensions (cm): W 26,9 x D 19,5 x H 13,5

1540.6 SÜDATRONIC Comfort

SÜDATRONIC series

Starlight

- Light function
- Handpiece tip and micromotor separable
- OMNICUT-Attachment possible
- Autoclavable handpiece tip

- Completely autoclavable

SÜDATRONIC Starlight

The short and more comfortable Profi-Line handpiece PX65 in conjunction with the NBX LED micromotor is distinguished by its integrated lighting system. An optimal illumination of the field of action is possible by light system and light motor.

Equipment features:
Item No. 1530.8 in Starlight version, with PX65 Profi-Line light handpiece and NBX LED micro motor

Technical data:
Connected load: 230 V alternating current, 50 Hz
Speed: 5.000 - 40.000 rotations per minute, infinitely variable
Weight: 4 kg (incl. handpieces)
Dimensions (cm): W 26,9 x D 19,5 x H 13,5

1540.8 SÜDATRONIC Starlight

SÜDATRONIC Starlight Power

The professional line light hand piece PX65L has been designed to be combined with the extra lightweight and compact NLX nano light motor, which delivers precise, vibration-free and quiet operation whilst at the same time giving the highest possible level of comfort when under high strain. The light, ergonomically optimal titanium casing ensures additional effortless operation and the integrated light system provides optimal illumination of the treatment area. The CLEAN-HEAD system prevents the penetration of liquids and protects against contamination. Sterilisation using an autoclave.

Equipment features:
Item No. 1530.10 in Starlight-power version, with dental light power handpiece and dental Power micro motor

Technical data:
Connected load: 230 V alternating current, 50 Hz
Speed: 8.000 - 40.000 rotations per minute, infinitely variable
Weight: 4 kg (incl. handpieces)
Dimensions (cm): W 26,9 x D 19,5 x H 13,5

1540.10 SÜDATRONIC Starlight Power

Accessories SÜDATRONIC

Special essay handpieces for SÜDA WET TECHNIQUE

More precision for special applications

It's really easy to change the handpiece

Simply remove the handpiece from the micromotor ...

... and attach the OMNICUT attachment or transmission.

OMNICUT

The OMNICUT attachment is a useful addition to the high-quality water technology appliances. Simply remove the hand piece from the Pododent micromotor and attach OMNICUT; the rotating mini blades remove even stubborn, thick calluses in a matter of seconds, without leaving any skin dust behind! The blades are replaceable and can be sterilised. Optimal cutting quality is guaranteed even after several treatments.

- 2 blades (= 1 set) are included in the delivery.
- Suitable for Pododent micromotors NBX, NBX LED and NLX nano.

Item No.	
1503.8	OMNICUT-attachment
1503.800	OMNICUT-attachment, 20 pcs (10 set)

SÜDA transmission handpiece

This extremely handy and lightweight hand piece reaches up to 200,000 rpm. This high rotational speed combined with small diamond cutters enables exact, precise and vibration-free operation on corns, calluses, nail fold area and nails. This leads to a shorter operation time because of the short 'touch', no pressure and precision which is a big advantage for therapists as well as customers/patients.

- Precise, quick and exact operation.
- Pleasant, pain-free treatment.
- Suitable for Pododent micro motors NBX, NBX LED, NLX nano

Item No.	
1398	SÜDA transmission handpiece

SÜDA Compact Class

High-Performance wet technique plus three-way nozzle in SLIM LINE Design

Choose from 4 different wet technique handpieces / micromotors:

Top-quality and low maintenance:
The specially coated glass cover

Magnifying lamp holder
integrated on both sides

Individually configurable spray
handpiece + three-way nozzle
in extending handpiece holder

Top drawer with folding front
as additional shelf space

Optionally with all-over
UV-compartment

High lower draw

Easy access via side wing flap

Large, smooth running wheels

Item No.	Accessories
1245.006	Air motor oil, 250 ml

unoSPRAY

The entire spectrum of the SÜDA Compact Class in the elegant SLIM LINE Design has been expanded to include a powerful wet technique version with the new treatment unit, unoSPRAY.

The manifold treatment unit offers a high level of individual adaptability: So not only can you adjust the configuration of the cabinet (i.e. UV compartment, EASY-OPEN etc.) according to your needs, but also the tools/micro-motors.

Available in
EASY-OPEN or with
recessed grip for
opening the drawer

SÜDA Compact Class

The Combination of suction, wet technique and three-way nozzle

Combine according to your demand.

Optionally LEFT or RIGHT
WET TECHNIQUE - Spray tool/micro-motor available in different variants and optional three-way nozzle

Optionally RIGHT or LEFT
SUCTION TECHNIQUE - Powerful system, choice of up to 25,000 rotations per minute for all coarse filing or up to 40,000 rotations per minute for all fine applications/fissure work

Item No.	Accessories for ordering
1995.6	Add-on kit for radio foot switch
8415.2	Micro-dust bags, 1 pack each with 5 pieces
1995.003	collet chuck
1245.006	Air motor oil, 250 ml
1245.006	Compressor oil, 500 ml

spray vac

All-In-One Solution: SÜDA spray vac

The new combination unit in SLIM LINE Design offers you everything you need for a broad and professional application spectrum. You use the automated system variants - suction and wet technique – as well as the optional three-way nozzle. You will also find plenty of storage space in the elegant treatment unit, including an optional UV compartment.

Compressed air innovation

A new dimension in price and performance

podoAIRspeed

The new compressed air operated treatment unit podoAIRspeed opens up new dimensions in compressed air treatment technology when it comes to technical components, working ergonomics and efficiency as well as functionality and design.

With its extremely favourable cost/benefit ratio, it offers a real alternative to micromotor-operated suction or wet technology systems even for small foot care practices.

Elegant. Ergonomic. Functional.

Hygienic and sturdy glass plate with special coating

Magnifying lamp holder integrated on both sides

Portable handpiece holder

The flap can be used as an additional storage tray or technical module for individual fine-tuning (see detailed picture on the next page)

Drawers with handle shell or in EASY-OPEN version

Optional UV-compartment

Large smooth running casters

Turbine handpiece

NT-handpiece/air motor

three-way-nozzle

Side flap to store the foot switch

podoAIRspeed

- Compressed air operated treatment technology
- Compressed air controlled, infinite revolution regulation
- Fine spray regulation

Equipment features:

- Compact functional cabinet, easily moved
- Instrument tray, shelves, storage space
- Pressure display
- Noise insulated compressor cabinet – space-saving
- Magnifying lens holder
- „plug & play“ function of all modules
- Service-friendly

Technical data:

Dimensions W/D/H (cm): 54,5 / 41 / 86
 Weight: Approximately 46 kg

Delivery includes:

Treatment unit,
 Air motor handpiece (air motor + handpiece),
 Triple spray turbine handpiece,
 three-way nozzle,

NEW individual handpiece and turbine configuration

Compressed air for the smallest offices

podoAIRmini

Equipment features of the control unit:

- Low maintenance, durable plastic-coated finish
- Working surface with stainless steel finish rail (rear and sides)
- Pull-out unit with glass front or optionally an alternative integrated UV unit in the same place
- Equipped for magnifying lamp attachment on the left
- Drawers and pull-out units with comfortable, cushioned indentures
- Easy-to-reach, laterally positioned controls.
- Technology with lateral revolving door and a mounted pressure regulator, water separator and collecting vessel with pressure indicator
- Centrally positioned additional retractable and rotating controls, which can be reached on both sides
- An open technical panel with a mounted pressure regulator, water separator and collecting vessel with pressure indicator on the centre of reverse side

Footcare Cases

Podiatry case DAS RAUMWUNDER

- Extendible transport aid (telescopic); functional division with folding frontpage (for improved access):
- Easy to clean surfaces: Plastic coated inside, aluminium outside: with 2 detachable work tables
- Suitable for podiatric devices PEDO Sprint ECO/50/100, ASTERIA 1000 and Waterspray 5000 and 6000.

Delivery includes:

- Case (empty); 2 empty glass bottle;
- 1 Instrument bag (without contents)
- Grinder-box (without contents)

Technical data:

Weight (empty): approx. 6,8 kg
Dimensions (cm): W 45,5 x D 21,5 x H 54

Item No.	Accessories and spare parts
8913.78	Podiatry case „Das Raumwunder“
1614.200	Universal case cable, 5 m
8913.20	Carrier strap (no fig.)
8919	Treatment lamp Flexi-light

Podiatry case MINIPRAX

- Sturdy case for daily use
- Surfaces made of scratch-resistant plastic and therefore very resistant and durable
- Attractive design: black with rounded abutting edges of aluminum. Compact size.
- Well-organized, functional „inner life“.
- Suitable for footcare device PEDO Sprint ECO/50/100, ASTERIA 1000 and Water Spray 5000 and 6000.

Delivery includes:

- Case „Miniprax“ (empty) with mounted double socket
- Equipped with eyelets to attach a carrying strap; 2 keys for the clasp lock, instrument interface made of drill, triple hard shell base.
- Inside pocket with cable, 1.5 m long; cutter box (empty)

Technical data:

Weight (empty): approx. 4,5 kg
Dimensions (cm): W 42 x D 24 x H 38

Item No.	Accessories and spare parts
8913.12	Podiatry case „MINIPRAX“
1614.200	Universal case cable, 5 m
8913.20	Carrier strap (no fig.)
8919	Treatment lamp Flexi-light

i Device, treatment lamp, instruments and other decorative items not included.

Podiatry case de Luxe

Elegant, long-lasting wooden shell case; sturdy aluminium frame, attractive design, practical interior composition. Suitable for podiatric device NT 40 (1505.1) and NT 40 light (1505.2).

Delivery includes:

- Podiatric care case NT 40 (without device)
- Grinder-box (empty) Item No. 8311.5
- Angular line cord NT 40 (short)
- 1 case bottle, empty.

Technical data:

Weight (empty): approx. 5 kg
Dimensions (cm): W 44 x D 36 x H 14

Item No.	Included in delivery
1616.5	Podiatry case de Luxe
5040	Foot Balm, 75ml stand-up tube
5051.8	Nail repair, 20ml pipette bottle
5065	Antimycotic nail repair, 20ml pipette bottle
5066	Salicylcreme, 60ml glass
5068	ATP Tincture, 10ml pipette bottle
5069.1	Tea Tree Oil, 20ml bottle
Item No.	Accessories and spare parts
1614.200	Universal case cable, 5 m
8919	Treatment lamp Flexi-light

The wide range of consumables care & more offers you everything you need for your daily work in the institutes.

ROLL-ON FRUIT SET

ROLL-ON BASE SET

WAX CARTRIDGES IONTO-COMED

In the ROLL-ON SYSTEMS of IONTO-COMED fit the following Wax Cartridges:
 Item No. 8519.001, 8519.002 Wax cartridges NATURE
 Item No. 8519.014, 8519.015, 8519.016 FRUIT Wax cartridges
 Item No. 8519.013, 8519.012 Wax cartridges AZULENE

1 ROLL-ON FRUIT SET
 Item No. 8519.9

This reasonably priced set for starters with a ROLL-ON single station. It offers everything that is necessary for epilation and may at any time be extended with further ROLL-ON-individual stations.

- Set beinhaltet:**
- Item No. 8519.003 Wax remover
 - Item No. 8519.014 Wax cartridge citrus, width 45 mm
 - Item No. 8519.015 2 x Wax cartridge mango, width 45 mm
 - Item No. 8519.016 Wax cartridge coconut, width 45 mm
 - Item No. 8519.46 2 x ROLL-ON Single station FreeCode
 - Item No. 9163.10 Nonwoven cloth strips

2 ROLL-ON BASE SET
 Item No. 8519.4

- Set includes:**
- Item No. 8519.001 Wax cartridge nature, width 45 mm
 - Item No. 8519.002 Wax cartridge nature, width 15 mm
 - Item No. 8519.003 Wax remover
 - Item No. 8519.014 Wax cartridge citrus, width 45 mm
 - Item No. 8519.016 Wax cartridge coconut, width 45 mm
 - Item No. 8519.015 Wax cartridge mango, width 45 mm
 - Item No. 8519.46 2 x ROLL-ON Single station FreeCode
 - Item No. 9163.9 Nonwoven cloth strips
 - Item No. 9192 Epilatorium

- 3 Wax cartridges NATURE
 Item No. 8519.001 Width 45 mm, 105 g
 Item No. 8519.002 Width 15 mm, 105 g
 Oil-soluble, highly productive waxes in the practical Roll-on cartridge for facial and body depilation. Available with wide and narrow roller. With 15 cm roller extra narrow for the face.

- 4 Wax cartridges AZULENE
 Item No. 8519.013 Width 15 mm, 105 g
 Item No. 8519.012 Width 45 mm, 105 g
 Wax cartridges with the calming effect of azulene. Is suitable for removing hair from sensitive areas. Available in two sizes. With 15 cm roller extra narrow for the face. With wide roller for the body.

ACCESSORIES

- 1 Roll of nonwoven towels
 Item No. 9163.22 length 100 m, Width 7 cm
 High-quality material for multiple use.
- 2 Roll holder
 Item No. 9163.3
 Suitable for roll of nonwoven towels, Item No. 9163.22.
- Nonwoven cloth strips
- 3 Item No. 9163.9 Pack of 100 pcs., Length 220 x width 70 mm
- 4 Item No. 9163.10 Pack of 100 pcs., Length 370 x width 70 mm
 Tearproof nonwoven cloth strips for professional depilation.
- 5 Nonwoven cloth strips face
 Item No. 9163.7 Pack of 50 pcs., Length 66 x width 22 mm
 Strip size especially for the face.
- 6 Fleece roll with honeycomb structure (not shown)
 Item No. 9163.20 7.5 cm x 100 m
 From tear-resistant material. Honeycomb structure makes it easier to work with warm waxing. Attack the hair very well.
- 7 Fleece roll with honeycomb structure (not shown)
 Item No. 9163.8 7.5 x 23 cm, 200 pcs.
- 8 Wood spatula
 Item No. 9833 Pack of 20 pcs., Length 150 x width 20 mm
 For applying wax to small parts of the skin (e. g. face).

- 9 Metal spatula
 Item No. 8375
 For thinly applying DEPILA wax during body treatments. Length 210 x width 30 mm
- 10 Plastic spatula, blue
 Item No. 9851. 1 Pack of 25 spatula
 For applying wax to small parts of the skin and for removal of preparations from creme pots. Length 145 x width 15 mm

CARE

- 11 Pretreatment gel
 Item No. 9163.4 1 bottle of 200 ml
 Antiseptic, soothing product for preparing the skin for depilation. Bottle with pump dispenser.
- 12 Wax remover
 Item No. 8519.003 1 bottle of 100 ml
 Item No. 8519.004 1 bottle of 500 ml
 Cleanses the skin after depilation. Removes all wax residuals and contains at the same time caring active agents.
- 13 Epilatorium
 Item No. 9192 1 bottle of 100 ml
 Item No. 9192.1 1 bottle of 250 ml
 Fat-free lotion with effect of inhibiting hair growth. Calms the skin after epilation.

CARE&BASIC
EYEBROWS AND EYELASHES COLOR

- 1 **care&BASIC Eyebrow & Eyelash Colour**
Item No. 9883.10 black, 15 ml
Item No. 9883.20 blue-black, 15 ml
Item No. 9883.30 natural brown, 15 ml
 Professional eyebrow and eyelash colour made in Germany for long-lasting and intense colour. Give the eyes more expression and the eyelashes more volume and length. The cream base is dermatologically tested and specially developed for professional use. A tube with 15 ml contents is enough for about 30 applications. A colour application stick and instructions are included in each package.
- 2 **care&BASIC Cream Developer**
Item No. 9883.4 60ml
 Mix and activate eyebrow and eyelash colour. The pleasant creamy consistency hinders unnecessary thinning of the colour paste when mixing, which enables a lighter and more targeted application of the colouring. The dispenser integrated in the bottleneck enables the simple, economical and exact dosing of the developing cream.
- 3 **care&BASIC Eyelash Lamellas**
Item No.9883.5 96 pcs
 The lamellas made of special paper lie smoothly on the skin, protect it from staining and absorb excess eyelash colour.

 Item No. 8636 Paraffin bath hand

The effect of the paraffin bath is increased on a multiple when special skin care products are used prior to, during and after treatment. With the COMFORT set you acquire all necessary products for optimizing the paraffin treatment. Just try it out!

Basic

Basic

Consumables

Consumables

APPLICATION

1. Disinfect hands.
2. Apply a cleansing tonic.

3. Spray hands with the paraffin spray.
4. Wear your client now the plastic protective gloves.

5. Wear your client now the terry glove.
6. After the desired residence time, take the plastic glove together with the paraffin layer off.

Paraffin cartridges

Spray cartridges to refill / filling the spray paraffin device, Item No. 8633/8634.

- 3 **Neutral**
Item No. 8633.1 6 pieces á 80 gr.
- 4 **Mint and Tea Tree Oil**
Item No. 8633.2 6 pieces á 80 gr.
- 5 **Peach**
Item No. 8633.3 6 pieces á 80 gr.
- 6 **Replacement spray head (not shown)**
Item No. 8633.4
Replacement spray head for Item No. 8633.1, 8633.2 and 8633.3.

ACCESSORIES

- 1 **Hydro-Repair emulsion**
Item No. 8630.3 250 ml
With collagen and elastin. Moisturizes the skin after cleaning. As active agent cream optimally suitable for the intensive care of the skin prior to the paraffin bath.
- 2 **Mild cleaning tonic**
Item No. 8630.2 250 ml
With lavender and rosemary. For pre-cleaning hands and feet prior to paraffin bath.
- 3 **Protective crème**
Item No. 8630.8 250 ml, for hands
- 4 **Item No. 8630.9 250 ml, for feet**
Nourishes and protects after paraffin bath. Also suitable for daily use
- 5 **Towelling gloves, lined**
Item No. 8630.4 1 pair
Terry-cloth and inner lining made of 100 % cotton. Put hands in protective gloves (Item No. 8630.6) after paraffin bath and then cover them with the towelling gloves for maintaining the heat as long as possible. Washable up to 60° C, do not tumble dry.

- 6 **Towel-socks, lined**
Item No. 8630.5 1 pair
Terry-cloth and inner lining made of 100 % cotton. Put feet in protective foil bags (Item No. 8630.7) and then cover them with the towel-socks for maintaining the heat as long as possible. Washable up to 60° C, do not tumble dry.
- 7 **Disposable plastic protective gloves**
Item No. 8630.6 1 bag of 100 pcs.
Prevents impurities and increases the „occlusive effect“.
- 8 **Protective foil bag / feet**
Item No. 8630.7 1 bag of 100 pcs.
Prevents impurities and increases the „occlusive effect“.

SPRAY PARAFFIN

Sets new standards in hygiene and ease of use - hygienic, efficient, simple and fast. The paraffin is dispensed into cartridges that are heated in a comfortable heater and then simply sprayed on the skin. It solidifies on cooling to the skin where there is an occlusive effect (sweating), which improves the penetration of the active ingredients. There is no transfer of germs possible from one customer to the next. The wax is ready for use very fast and perfect for hands and feet.

- 1 **Spray Paraffin Heater BASIC**
Item No. 8634
The practical single-station for your studio or on the road. This single station can be extended at any time.
- 2 **DUO heat system wax and paraffin**
Item No. 8633
For quick and easy heating of coded / uncoded wax cartridges and wax cartridges to 6 spaces. Off-On switch and individual temperature control by rotary knob on the device.
Dimensions: W 285 x H 223 x D 135 mm.

 Material 100 % cotton. Machine washable. With practical Velcro fastenings. Also suitable for larger head sizes.
- 2 Stretch, terry cloth hair band**
Item No. 8304.1 8 cm wide, 1 piece
 White, machine washable.
- 3 Hair band**
Item No. 9167.1 1 Pack of 100 pieces
 Smocked disposable hairband made of non wovens. Due to the high elasticity suitable for all head sizes (also for men).
- 4 Fleece caps „folded“**
Item No. 9831.2 Pack of 100 pieces
 Practical cap made of 100 % cotton pulp. Protects the hair during treatment. Washable. Good fit. Cosy, soft rubber.
- 5 Cosmetic spatula**
Item No. 9851 15 cm long
 For hygienical removing of preparations from creme pots.
- 6 Mixing bowl**
Item No. 9848.4 white, Ø 11 cm
 Flexible and yet stable mixing bowl for mixing masks and modellages, especially suitable for solid becoming masks. Due to its flexibility the bowl fits nicely in the hand. Due to the elastic material masks residuals can be removed without using water and easily by slightly deforming the bowl. For disinfection, use a cotton wool pad dampened with alcohol. The height of the side edges enables a easy mixing of masks.
- 7 Face mask**
Item No. 9174.1 Pack of 100 pieces
 Unsaturated fleece mask with recesses for eyes, mouth and nose. Covers the neck up to the cleavage. For all treatments, e.g. masks, packs, where a base is necessary and direct skin contact is not desired, respectively.

WAVE

WAVE Instruments Innovative design in top-quality

The instrument series WAVE is impressive due to its unique manageability. This genuine innovation made by EKS extremely facilitates everyday work in podiatry. The extremely slim shape of the round instruments enables a fatigue-free working also for small hands. From the start, these instruments lie well in the hand. We are convinced, that these tools become an essential part of your working instruments.

In order you definitively get quality made in Solingen, all WAVE instruments have been provided with a desing protection of the European Office for Harmonization in Alicante. This prevents you from being disappointed by cheap imitations.

WAVE-Instrumente

- 1 **WAVE head cutter**
Item No. 2300 14 cm
Traditional shape for cutting on both sides. The risk of injury is minimized by the WAVE design.
- 2 **WAVE half-blade head cutter**
Item No. 2300.1 14 cm
Half-blade head cutter for working on one side of the nail. Optimal handling due to the WAVE design.
- 3 **WAVE nail pliers**
Item No. 2301 14 cm
Nail pliers designed as side cutters. The WAVE design makes them ergonomically perfect.
- 4 **WAVE nail pliers with no lock**
Item No. 2301.1 12,5 cm
With double spring. Suitable for small and medium-sized nails.
- 5 **WAVE cuticle nippers, angled**
Item No. 2302 10 cm
Angled cut, for precise and injury-free removal of the cuticle. Cutting edge 6 mm.

WAVE Instruments

- 1 **WAVE corner nippers, round**
Item No. 2303.11 11,5 cm
Item No. 2303.13 13 cm
Corner nippers with round tip and rounded cutting jaws. So less risk of injury.
- 2 **WAVE corner nippers flame**
Item No. 2304.11 11 cm
Item No. 2304.13 13 cm
Special corner nippers for deep-seated, ingrown nails. Work on difficult nails is improved by the tapered jaws.

WAVE safety

WAVE safety instruments

Newly developed instrument series for injury-free working, due to blunt tips, which shall facilitate working in risk patients. The head cutters of the WAVE safety design are preferably used for daily work. Due to the lacking tips the risk of injuries is decidedly minimized. Also suitable for diabetics.

- 3 **WAVE safety head cutter**
Item No. 2305 14 cm
Ideally suited for any work on the nails. No sharp tips, so no risk of injury.
- 4 **WAVE safety corner nippers „flame“**
Item No. 2306.11 11,5 cm
Item No. 2306.13 13 cm
Classic corner nippers with extremely long cutting edge for treating deep-seated or ingrown nails. Ideal for working on deep-seated nail corners, especially in risk patients/clients. The blunt tip prevents the risk of injury.

PREMIUM Instruments

Our PREMIUM instruments are:

- Solingen steel
- Made in Solingen, so really „MADE IN GERMANY“
- individually tested and hand-picked
- Naturally stainless
- Easy care
- Resistant to disinfectants
- Heat resistant up to 200° C
- Equipped with an excellent cutting quality
- Long life (wear)
- Consistently accurate (no joint play!), even after many sterilizations!

PREMIUM Instruments

- 1 PREMIUM head cutter**
Item No. 2111 14 cm
Top instrument for accurate processing of nails. Surface sandblasted, with double Cutting area 17 mm.
- 2 PREMIUM head cutter „flame“**
Item No. 2111.2 14 cm
Double-sided head cutter with extremely thin jaws; well for deeper lying nails suitable. Stainless steel mat. Cutting area 20 mm.
- 3 PREMIUM half-blade head cutter**
Item No. 2111.6 14 cm
Top instrument for accurate processing of nails. surface sandblasted, with double spring. Cutting area 15 mm.
- 4 PREMIUM Translation head cutter**
Item No. 2111.1 15 cm
Translation nipper in the form of a cutter head: This makes the cut even the thickest nails a breeze! Cutting area 15 mm.
- 5 PREMIUM head cutter MINI**
Item No. 2095 11 cm
Very handy, with a slightly curved cutting head. For fine work with dainty hands. Cutting area 15 mm

PREMIUM Instruments

- 1 PREMIUM Buffer nippers**
Item No. 2110 13 cm
Stable Nail clippers with so-called buffer spring. Also suitable for very thick nails. Instrument sandblasted steel in 1a quality. For disinfection / sterilization remove the spring. Cutting area 19 mm.
- 2 PREMIUM Nail nippers without lock**
Item No. 2110.1 13 cm
Handy, small nail nipper with curved inside edge. Simplifies the work by the lock-free handle. Cutting area 16 mm.
- 3 PREMIUM Nail splitter**
Item No. 2118.1 13 cm
Practical nail splitter specially for work on ingrown nails or rolling nails. Safe cut through the two different jaws. Cutting area 19 mm.
- 4 PREMIUM Corner nippers, round**
Item No. 2113.2 10 cm
Item No. 2113 11,5 cm
Item No. 2113.1 13 cm
Nail corner nippers with double spring. Cutting jaws slightly rounded and despite stable cutting surface extremely narrow. Sandblasted surface.
- 5 PREMIUM Corner nippers, pointed**
Item No. 2115.2 10 cm
Item No. 2115 11 cm
Item No. 2115.1 13 cm
Top corner nippers for normal access nails. The excellent processing even after prolonged use make a precise work possible. Sandblasted with hinged double spring.

PREMIUM Instruments

- 1 **PREMIUM Corner nippers for deep nails**
Item No. 2116 11 cm
Item No. 2116.1 13 cm
Precisely crafted corner nippers for small, little accessible nails. Nippers sandblasted with hinged double spring. Cutting area 2116: 15 mm; Cutting area 2116.1: 17 mm
- 2 **PREMIUM Ergonomic Cuticle nipper**
Item No. 2090 10 cm
Cuticle nippers with angled cutting head; relieves the wrist and facilitates removal of the cuticle. Cutting area: 7 mm
- 3 **PREMIUM Cuticle nipper**
Item No. 2114 10 cm
Cuticle nippers with hinged double spring. Nippers handle sandblasted. Instrument from 1a steel quality.
- 4 **PREMIUM Eyes handle cuticle scissors**
Item No. 2112 10 cm
Fine cuticle scissors with so-called "eye control". Ideal for removing protruding nail skin and corns processing. Scissors handle sandblasted. Instrument from 1a steel quality. Cutting area 5mm.

STARTER SETS

- 1 **STANDARD instrument set**
Item 7099.4
STANDARD instrument set, 10 pc. with all important instruments. For daily footcare treatments. Indispensable in classic footcare. All instruments are in stainless steel quality and non-rusting.

Set includes:
Head cutter, 14 cm
Corner nippers, 13 cm
Cuticle nippers, 10 cm
Double instrument
Bandage scissor
Splinter tweezers, 7,5 cm
Scalpel remover
Scalpel handle, size 3
SÜDA instruments care pen
disposable blades, size 10

- 2 **PREMIUM instrument set**
Item 7099.5
All instruments in the PREMIUM instrument set are made of stainless steel and naturally non-rusting. The nippers are manufactured in Solingen, Germany, individually tested and hand-picked.

Set contains:
Item 2116.1 PREMIUM corner nippers for deeper-seated nails.
Item 2111 PREMIUM head cutter 14 cm
Item 2114 PREMIUM cuticle nippers 10 cm
Item 2118.8 PREMIUM double instrument
Item 2169 Scalpel handle, size 3
Item 2169.10 Blades, size 10
Item 2172.1 Scalpel remover
Item 7030.3 Bandage scissor, 14 cm
Item 7185.2 Splinter tweezers, 9 cm
Item 2196 SÜDA instruments care pen

The appropriate cutters for your requirements.

SÜDA CAP GRINDERS

The SÜDA cap grinders combine top-quality with unbeatable prices.

The advantages of cap grinders are obvious: strong abrasive properties, hygienically perfect due to single-usage, easy handling.

IMPORTANT : When using these abrasive instruments, the recommended rotation speed must not be exceeded. A cap grinder with too high rotation speed is uncomfortable for the client and results in additional wearing of the device.

Optimum efficacy only possible in combination with SÜDA grinder rounds!

SÜDA care

BASE CARE

1 SÜDAcare Foot Balm

- Item No. 5040 75 ml tube
 Item No. 5040.2 150 ml tube
 Item No. 5040.3 500 ml bottle (cabinet)
 Item No. 5040.4 1000 ml bottle (cabinet)

Gentle care for every day with the active ingredients of chamomile oil, bisabolol and Azulene. A refreshing blessing for tired and worn-out feet; with lasting vitalizing effect. This should be massaged into your skin several times a day.

2 SÜDAcare Foot Balm Plus

- Item No. 5041 75 ml tube
 Item No. 5041.2 150 ml tube
 Item No. 5041.3 500 ml can (cabinet)

For dry skin with little fat. Contains the valuable active ingredient of foot balm no. 5040, a high amount of caring oils and fats. Particularly recommended for use in the evening.

3 SÜDAcare Creme Foam Intensive

- Item No. 5086 150 ml can

Noticeable care for normal and dry skin. Intensive moisturizer with 10% urea. Is absorbed easily without leaving any oil film on the skin. The light-weight and breathable formula nourishes the skin longlastingly with moisture, preserves the elasticity and protects the skin from drying-out. Rough skin or cracks can be reduced when using regularly. Suitable for standard applications or for diabetics.

4 SÜDAcare Leg Balm

- Item No. 5045 75 ml tube
 Item No. 5045.3 500 ml bottle (cabinet)

For smooth, attractive legs. With vitamin E, panthenol and extract of horse chestnut. Promotes blood circulation, combats discoloration and firms your tissue. Simply massage into your legs regularly with gentle gliding strokes.

BASE CARE

1 SÜDAcare Foot Bath Salts

- Item No. 5057 250 g pack
 Item No. 5057.4 1000 g pack
 Item No. 5057.5 2500 g pack (cabinet)

Stimulating blessing for your feet after a hard day. Invigorating, disinfecting. Makes your skin soft and receptive for the subsequent podiatric treatment or a treatment at the institute. Pleasantly fresh scent of lime, mint, mandarin and lavender.

2 SÜDAcare Foot Bath

- Item No. 5048.2 200 ml bottle
 Item No. 5048.3 500 ml bottle (cabinet)
 Item No. 5048.4 1000 ml bottle (cabinet)

Is added to the warm water for a foot bath, perfectly preparing your skin for the work of the podiatrist. Cleans, refreshes and invigorates your feet; callus, corns and weals are softened, foot complaints are alleviated. Works at the same time deodorizing and disinfecting. Prevents athlete's foot.

3 SÜDAcare Foot Peeling

- Item No. 5034.2 150 ml tube
 Item No. 5034.3 500 ml pot (cabinet)

Caring and regenerating peeling cream with anti-bacterial properties. Contains tiny polyethylene balls as friction-providing agent or particularly gentle peeling. This also contains Neem extract (anti-bacterial) and panthenol (skin regenerating). Without mineral oil or Vaseline; without colorants.

ALL-ROUNDERS

4 SÜDAcare Herbal Fluid

- Item No. 5058.2 200 ml bottle
 Item No. 5058.4 1000 ml bottle (cabinet)

Intensive lotion with caring ingredients (chamomile, azulene, jojoba oil) for dry skin, which tends to flake on feet, ankles and lower legs. Non-greasy. Ideal for massages after sports and fitness or cases of exhaustion.

5 SÜDAcare Aloe Vera Gel

- Item No. 5078 200 ml dispenser

Aloe vera moisture for alleviating lesions and skin irritation, but also for everyday care of the skin, making it smooth and supple. For dry skin on the feet, which is dehydrated and therefore cracked and painful. In addition to a high percentage of aloe vera (more than 90%), SÜDA AV Gel also contains menthol extracted from pure peppermint oil. Pentavitine, based on natural sugar complexes, is added as a highly effective moisture regulator. It is equivalent to the natural carbohydrate combination in human calloused skin. No added perfumes or colorings.

6 Propolis-Balsam

- Item No. 5097 75 ml tube

Ideal for the care of chapped and flaky skin, as tamponades adding, for maintaining the health of the nail fold, but also for skin irritation (sunburn), inflammation, injuries (small cuts and abrasions) or eczema suitable. Works by the ingredients of honey and propolis antibiotic, antiviral, antifungal, and wound-healing and anti-inflammatory. The addition of olive oil has a skin-care and anti-irritant effect and prevents the skin from drying out.

SÜDA care

SÜDA care

1

- 1 SÜDAcare Canola Lipo
Item No. 5033 75 ml stand-up tube
Item No. 5033.2 150 ml stand-up tube
Item No. 5033.3 500 ml bottle (cabinet)

Creamy balsam for stressed skin on the feet: gentle protection in the day, intensive care at night! Contains canola oil as a special ingredient (anti-inflammatory; reduces the loss of transepidermal moisture). Also contains allantoin to support the natural healing process of damaged skin - even if cracked and fissured! No mineral oils or Vaseline; no colorings.

- 2 SÜDAcare Foot Cream with 15% Urea
Item No. 5077 100 ml dispenser
Item No. 5077.1 200 ml dispenser (cabinet)

For hyperkeratosis/fissures in dry, very dry and dehydrated skin. In addition to urea (15%), which has a keratolytic effect on the epidermis, black cumin oil has been added to promote the metabolic process (regulates hornification, amongst others) along with evening primrose oil (predestined for scaly, inflamed skin). Shea butter has been added to improve consistency. No preservatives, Vaseline or mineral oil.

- 3 SÜDAcare Fissurebalm
Item No. 5044.6 50 ml pot
Item No. 5044 75 ml tube
Item No. 5044.2 150 ml tube
Item No. 5044.3 500 ml can (cabinet)

Special care for strongly calloused, rough, dry and chapped skin. Contains valuable substances, among them carrot oil for the natural regeneration of your skin. On afflicted parts of your skin, such as your heels or soles, the balm should be applied thickly and left to work (preferably over night, covered with cotton socks - to protect your bed clothes).

CALLUS

- 4 SÜDAcare Callus Softener
Item No. 5054.2 200 ml bottle
Item No. 5054.4 1000 ml bottle (cabinet)

Ideal for the professional treatment before apparative podiatry. Softens caloused skin regions lastingly. Contains lactic acid (as softening agent), as well as chamomile extract (to soothe your skin). Additionally enriched with soothing components like allantoin and arnika.

- 5 SÜDAcare Callus reduction pen
Item No. 5085 4 ml pen

Strong hornifications for example at the toe or finger tips, laterally or sporadically at hands and feet. The pen offers focused and quick callus reduction by a highly effective concentrate. Contains salicylic, glycolic and fruit acid. The skin is smoothened with panthenol. A regular use reduces the generation of new hornifications. The modern pen system enables a directed application and is highly effective with the precise applicator.

HEAT & COLD

- 1 SÜDAcare Foot Balm Special
Item No. 5042 75 ml tube
Item No. 5042.3 500 ml bottle (cabinet)

With heat effect, which is generated by highquality, circulation-stimulating active ingredients. Ideal against cold feet - especially at night, but also in the cold season! Caring effect due to generously dosed, natural Azulene. Lightly massage into your feet morning/evening when required.

- 2 SÜDAcare Ice Gel
Item No. 5043 75 ml tube
Item No. 5043.3 500 ml bottle (cabinet)

Refreshes tired, overheated feet. Particularly pleasant after long periods of standing but also after intensive athletic activities. Cooling effect with long-time effect due to a large amount of menthol. Additional care for irritated skin due to chamomile extract, as well as re-moisturizing substances and valuable essential oils.

HAND AND NAIL CARE

- 1 **SÜDAcare Hand Soap**
Item No. 5052.2 200 ml bottle
Item No. 5052.4 1000 ml bottle (cabinet)
Skin-protecting liquid soap with caring properties. Especially recommended when your hands need to be washed frequently, for instance at the podiatric institute. Contains chamomile extract.
- 2 **SÜDAcare Hand Balm and Hand Lotion**
Hand Balm
Item No. 5049 75 ml tube
Item No. 5049.7 30 ml tube
Hand lotion
Item No. 5049.2 200 ml bottle
Item No. 5049.3 500 ml bottle (cabinet)
Highly effective crème (or lotion respectively) to protect and care for your hands when you work as a podiatrist. Also suitable for retail! Is absorbed by your skin quickly, therefore no "slippery hands". Can be used several times per day, depending on your workload.
- 3 **SÜDAcare Nailcare pen**
Item No. 5084 5 ml pen
Nourishes stressed nails. Strengthens brittle and dry nails and quickly supports a healthy look. The nails become brighter and more flexible. The Nailcare pen contains panthenol, keratin and natural oils. The smell is pleasant and the product is absorbed quickly.
- 4 **Cuticle cream**
Item No. 5051.7 30 ml upright tube
For the lasting strengthening of brittle and dry nails of your feet and hands. Promotes the growth of your nails and makes them nicely pliable. Preventive effect against the breaking and splintering of your nails. Ideal as a final treatment for severely damaged nails after the treatment with Nail Oil no. 5051.8 has led to an improved condition of your nails. Can be applied several times per day.
Active ingredients: bisabolol, ceratin and biotin.
- 5 **Nail Oil**
Item No. 5051.8 20 ml dropping glass
Nail oil: Characteristics and ingredients identical to the cuticle crème 5051.7 (however as concentrate). Recommended for the initial treatment of severely damaged nails. Small brush for the application inside the lid.
- 6 **Dosing pump for cabinet equipment**
Item No. 9250 For 500 ml bottles
Item No. 5056 For 1000 ml bottles
Convenient and economical removal, controlled dosage of SÜDAcare Cabinet goods. For bottles with 500 ml and 1000 ml.

SENSITIVE SKIN & NAILS

- 1 **SÜDAcare SÜDAN „F“ Spray**
Item No. 5050.6 200 ml vaporizer bottle
Item No. 5050.5 1000 ml bottle (cabinet)
Invigorating foot spray. Simultaneously unfolds a disinfecting, deodorating and mycosis-repressing effect. Complements the daily footcare and provides a comforting freshness for stressed feet. The spray pressure of the 200 ml bottle works by air pump - without propellant gas.
- 2 **SÜDAcare SÜDAN „F“ Cream and Solution**
Item No. 5050.7 30 ml tube
Item No. 5050.8 20 ml pipette bottle
SÜDAN „F“ cream
 - Effectively protects your skin, nails and nail fold from fungal infection.
 - Regular use prevents inflammations and recurring hangnails with anti-bacterial ingredients.
 - Contains panthenol and Bisabolol.
 - Excellent for finishing your daily foot and hand care.**SÜDAN „F“ solution**
 - Properties and ingredients identical to Südan „F“ cream 5050.7 (however as concentrate).
 - Recommended for professional care following treatment in the cubicle.
- 3 **SÜDAcare Microsilver Plus**
Item No. 5032 75 ml stand-up tube
Moist conditions on the feet can lead to numerous other symptoms. Aside from an unpleasant sensation and disturbing smell, such conditions provide the perfect environment for bacteria which cause skin mycosis. With Microsilver Plus cream, we have introduced a skincare product which has a deodorizing action thanks to the active ingredient aluminium chlorhydrate. It prevents the development of sweat, thus removing the moist environment.
Percentage of microsilver: 0.1%
- 4 **SÜDAcare Microsilver Forte**
Item No. 5031 30 ml stand-up tube
This cream, which contains a higher proportion of microsilver, focuses on prevention of microorganisms in addition to improving moist conditions. The cream destroys viruses, bacteria and fungi, at the same time leaving them no real room for survival. Their ability to multiply or settle in small wrinkles/crevices in the feet is taken away if the cream is used to care for the feet.
Percentage of microsilver: 0.3%

Myko Nagel Myko Haut

SENSITIVE SKIN & NAILS

SÜDAcare Myko Nail
Item No. 5096 2 x 10 ml

Nail cosmetics for the strengthening and regeneration of toenails and fingernails. Made from 100% synergetic aromas. As an aroma or aromatic solvent, 1,2 propnadiol is a harmless substance with nurturing and conservative properties. Benzyl alcohol is added as a technical aid with conservative features, and is a natural product that can be found in jasmine flowers, clove oil, wallflower oil. Both substances are approved as food additives in accordance with EU regulations (1,2 propandiol - E 1520, benzyl alcohol - E 1519). In addition it contains SÜDAcare Myko nail anethol, a harmless aroma that can be found in many essential oils, such as aniseed or fennel for example. Aniseed is one of the aromas that, along with a variety of other added aromas, synergistically cares for and strengthens the nail.

The combination product is made up of the two solutions Day and Night. The Day tincture is to be used once in the morning and the Night tincture once in the evening. The differing compositions of the synergetic aromas ensure that Day, thanks to the natural disinfecting properties of the various aromas, deploys a high protective function against germs that surface throughout the day. In contrast, Night works by strengthening and constructing the nail.

SÜDAcare Myko Skin
Item No. 5096.1 100 ml

This nurturing, regenerative and protective skin spray made from 100% pure G.R.A.S. aroma synergies (approved according to the EU regulation) provides the ideal supplement to SÜDAcare Myko nail (Article No. 5096). The pleasantly light formula has properties that are refreshing, regulate skin hydration and protect against pathogens. It is quickly and fully absorbed by the skin, so that its nurturing effect can start developing straight away.

During initial use of the product, irritated and stressed skin is more likely to fall away in order for the skin to regenerate. This process can last for up to 8 weeks. The skin subsequently becomes fully intact and nurtured again, and feels smooth and silky.

SÜDA care

RED SERIES – SPECIAL PREPARATIONS

1 SÜDAcare Clotrineem Creme

Item No. 5076.1 50 ml dispenser

Protection from fungal infestation with clotrimazole and neem extract. Urea (5%) has been incorporated as a main ingredient in Clotrineem Plus Creme. At this concentration, urea has neither a keratolytic nor keratoplastic effect, but improves TEWL (transepidermal water loss) and serves as a NMF (natural moisturizing factor). This helps to retain the elasticity and function of the cell membranes. The skin is smooth and sealed, making it difficult or impossible for pathogenic bacteria to penetrate. Neem leaf extract, black cumin, evening primrose oil, clotrimazole and piroctone olamine make the cream an excellent protective and caring, special cream for the benefit of healthy feet.

2 SÜDAcare Clotrineem Solution

Item No. 5076 20 ml pipette bottle

For maintaining and protecting healthy nails against the risk of mycosis. In addition to neem leaf extract, with its anti-inflammatory and anti-bacterial properties, clotrimazole has also been added as an active ingredient at the approved strength. Clotrimazole destroys the cell membrane of fungi - the ability of fungi to produce a cell membrane is compromised. Piroctone olamine is also added for inhibiting energy metabolism in the mitochondria of the fungi. Bacteria are unable to penetrate skin which is protected in such a way.

3 SÜDAcare Antimycotic Nail Repair

Item No. 5065 20 ml bottle with brush

Fast-drying paste with anti-mycotic effect for the repair of brittle or cracked nails. Wraps itself around the damaged skin layer like a protective film and can be filed after drying.

4 SÜDAcare Nail Fluid

Item No. 5060 20 ml pipette bottle

Protects the nail and strengthens the resilience of the nail substance. Contains a special combination of raw ingredients including ethyl alcohol and valuable essential oils such as manuka oil, cajepout oil, oregano oil and cinnamon bark oil. When combined with the nail tincture, an ideal application to protect the nails against nail fungal infection. A moist nail area is the perfect breeding ground for pathogenic bacteria. The combination of active ingredients in the fluid and tincture (ethyl alcohol and essential oils) prevents this climate from forming. Application: Apply the nail fluid in the morning, dry off any excess nail moisture and disinfect. Apply the nail tincture in the evening. For nail formation and regeneration. Not for cubicle use. Ideal for end consumers.

5 SÜDAcare Nail Tincture

Item No. 5061 30 ml pipette bottle

Night protection and care for nails in danger of mycosis. Contains a balanced combination of active ingredients including essential essences such as tea tree oil, manuka oil, palmarosa oil, eucalyptus oil and thyme oil. When combined with the nail tincture, an ideal application to protect the nails against nail fungal infection. A moist nail area is the perfect breeding ground for pathogenic bacteria. The combination of active ingredients in the fluid and tincture (ethyl alcohol and essential oils) prevents this climate from forming. Application: Apply the nail fluid in the morning, dry off any excess nail moisture and disinfect. Apply the nail tincture in the evening. For nail formation and regeneration. Not for cubicle use. Ideal for end consumers.

6 SÜDAcare Tea Tree Oil

Item No. 5069 10 ml bottle

Item No. 5069.1 20 ml bottle

Item No. 5069.2 50 ml bottle

Versatile essential oil, extracted from the tea tree, which is indigenous to Australia. Contains several natural substances, such as terpine-4-oil and cineol. Note: Like all essential oils, tea tree oil can cause irritation if applied undiluted. Tea tree oil also needs an emulsifier if it is to mix with water. SÜDAcare tea tree oil can be mixed with creams, solutions, bath products etc. For use on foot sores, corns, to prevent fungus and eczema and for many other superficial problems. Suitable for end consumers.

7 SÜDAcare Nail Fold Cream

Item No. 5064 50 ml tube

Special cream for the treatment of the delicate nail fold. Enriched with K-Complex, a combination of active ingredients, consisting of healing herbal extracts, which support the self-healing process of your skin following minor injuries. Well suited for cushioning with fleece bandages.

8 SÜDAcare ATP Tincture

Item No. 5068 10 ml pipette bottle

To soothe and normalize the skin in cases of lesions, itching and insect bites. If required, it can be applied to the affected areas of your skin several times a day using the pipette; drip on and let it absorb. Can also be used on arms and legs. Suitable for retail.

9 SÜDAcare Salicylcreme

Item No. 5066 60 ml glass

Against the keratinization of the nail fold and as pre-treatment for corns. Softens the skin and makes it nice and supple. Also suitable for retail after consultation. Ingredients: vegetable fats like soy oil and maize oil, also salicylic acid, panthenol and bisabolol.

10 SÜDAcare Kera Special Callus Solution

Item No. 5079.1 20 ml pipette bottle

Item No. 5079 200 ml bottle (cabinet)

Item No. 5079.2 500 ml bottle (cabinet)

Keratolytic solution for softening keratoses -hyperkeratoses and cuticles on the hands and feet. A strong and effective solution for softening calloused skin before removal with a blunt scraper (Item No. 2098). Adapted for sale to end consumers as well as diabetic with specialized instructions from the pedicurist/podiatrist.

11 SÜDAcare Skin and Nail Softener

Item No. 5067 10 ml pipette bottle

Item No. 5067.1 50 ml pipette bottle

For the gentle and effective treatment of deformed and ingrown nails. After a short period of time, it softens nails and cuticles, thus easing the treatment. Pipette bottle for controlled dosing. Should only be sold to consumers after qualified specialist consultation and instruction.

12 SÜDAcare Nail Repair Gel

Item No. 5080 15 ml tube

SÜDA-Pex

SÜDA-Pex

SÜDA-Pex is one of the most effective mold-making material for individual creation of custom-made orthoses. Easy to handle and have a long life-time.

- 1 SÜDA-Pex**
Item No. 4190 SÜDA-PEX, Institute pack, cup of 250 g
 Pliable 2-component dough for the individual production of pressure relief cushions, bandages, caps and orthopedic shapes (Orthosis). The orthosis are washable and long-lasting.

Time for mix: approx. 30 sec.
 Time for Handling: approx. 1 min. 30 sec.
 Time for Hardening: approx. 3 min. 30 sec.
 Hardness: Shore A 68

- 2 SÜDA-Pex „soft“**
Item No. 4196 SÜDA-PEX, Institute pack, 2 cup of 250 g
Item No. 4196.1 Training pack, 2 cup of 100 g
 2-component pliable dough, which can be kneaded and shaped, which however clings better in cases of orthoses to the area between the toes, offering therefore a noticeably pleasant wearing-comfort.

Time for mix: approx. 30 sec.
 Time for Handling: approx. 1 min. 30 sec.
 Time for Hardening: approx. 3 min. 30 sec.
 Hardness: Shore A 45

- 3 SÜDA-Pex Soft Pipe**
Item No. 4198 Soft Pipe, 2 tubes at 80 ml
 Soft Pipe – the 2-component dough for easy use. Dosing is child's play with these two tubes – just as easy as the molding into an elastic pliable dough.

Time for mix: approx. 30 sec.
 Time for Handling: approx. 2-3 min.
 Time for Hardening: approx. 6 min.
 Hardness: Shore A 35 - 40

Preparations & Accessories

PROLINE

Selected ingredients - immediately visible treatment success

With IONTO SYMBIOSIS concept an innovative natural product is used as a support for high-dose, perfectly matched active ingredient components: cellulose. Take advantage of the cellulose masks for an impressive institute treatment.

You have the option to use the mask both in combination with machine-supported treatment methods, as well as perform a massage on the mask and thus save processing time and products.

The TT-cellulose masks are optimized for different skin types. Simply select the appropriate mask for your customers:

PROLINE ACTIVE INGREDIENTS-CELLULOSE MASKS

- 1 Problem Skin: Green Tea**
Item No. 8228.081 10 pieces
The Green Tea Mask has antioxidant, detoxifying and calming effects. It combines the anti-inflammatory characteristics of green tea with the wound healing power of camomile.
- 2 Sensitive Skin: Cherry Blossom**
Item No. 8228.080 10 pieces
Due to carefully chosen ingredients, the Cherry Blossom Mask relieves redness, relaxes stressed skin and gives it moisture.
- 3 Dry and tired skin: Deep Sea**
Item No. 8228.083 10 pieces
The moisturizing Deep Sea Mask contains SEAWEED EXTRACT and DEEP SEA WATER rich in minerals, which revives and cools the skin.
- 4 Moisture Booster: Hyaluron**
Item No. 8228.089 10 pieces

care
BEAUTYcare
BEAUTY

All care & BEAUTY ampoules are
paraben-, dye- and fragrance-free.

AMPOULES

- 1 care&BEAUTY SUPER-CLEAN ampoule**
Item No. 9223.90 10 pieces à 2 ml
Gentle, deep pore cleansing and deincrustation. Removing underlying skin impurities, sebum and dirt deposits - leaving a clear and clean complexion. Suitable for all skin types, but recommended in particular for oily, blemished skin.
- 2 care&BEAUTY HYDRO ampoule**
Item No. 9223.92 10 pieces à 2 ml
Rehydrating and moisturising the skin - for a radiant, rosy complexion with improved elasticity. Suitable for all skin types, but recommended in particular for dry, dehydrated skin.
- 3 care&BEAUTY ANTI-AGE ampoule**
Item No. 9223.91 10 pieces à 2 ml
Fights the signs of ageing. Wrinkles are reduced - leaving the skin looking firmer, smoother and younger. Suitable for all skin types, but recommended in particular for mature skin. Immediate effect by sesame protein complex.

- 4 care&BEAUTY SENSITIV ampoule**
Item No. 9223.93 10 pieces à 2 ml
Increasing the elasticity and strengthening the barrier function of the skin, whilst relieving any tension. Improves the TEWL (transepidermal water loss) of the skin and exerts an anti-inflammatory effect, replenishing lipids and moisture. Suitable in particular for neurodermatitis, and skin that is hypersensitive, dry or has a tendency to itch. Contains evening primrose, canola, pomegranate and sallow thorn oil. Non-ionised, oily consistency. NB: May cause brushes to turn red.
- 5 care&BEAUTY PURE ampoule**
Item No. 9223.94 10 pieces à 2 ml
For relieving skin irritation/inflammation and preventing the progression of acne. Increases skin moisture (moisturising effect) and balances the skin's properties. Exerts an antiseptic, antibacterial and anti-inflammatory effect. Particularly suitable for blemished, inflamed skin that tends to be oily. Contains zinc, canola, salicylic and lactic acid.

AMPOULES

- 1 care&BEAUTY COUPEROSE ampoule**
Item No. 9223.95 10 pieces à 2 ml
Immediately and noticeably effective in erysipelas, telangiectasia and dark circles around the eyes. Seals the vascular walls against water retention, lightens areas of hyperpigmentation and soothes inflamed as well as irritated skin. Strengthens the skin's own barrier function and regulates fibroblast activity. Contains horse chestnut, liquorice root, Indian pennywort, calendula and yeast.
- 2 care&BEAUTY HYALURON ampoule**
Item No. 9223.96 4 pieces à 5 ml
For a firmer, smoother, more even appearance of the skin. Provides the skin with sufficient moisture and reduces wrinkles. Stimulates the growth as well as activity of good and protecting bacteria, which strengthen the natural protective acid mantle, and also prevents skin irritation such as itching and redness. The skin is more resistant to the impacts of the environment and dehydration. Suitable for every skin type, especially recommended for more mature skin.
- 3 care&BEAUTY OCEAN ampoule**
Item No. 9223.97 10 pieces à 2 ml
Noticeably tightens the skin and acts as an intensive moisturizer and protection against free radicals. Reduces wrinkles by stimulating elastin synthesis and accelerating cell regeneration. Increases skin smoothness and preserves its youthful appearance. Particularly suited for mature skin prone to wrinkles. With red algae extract, panthenol and bisabolol.

NOURISHING PREPARATIONS

- 4 care&BEAUTY Emulsion**
Item No. 9223.900 200 ml
For ionization (-) of non polarized ampoules which are used for the application with the IONTO GALVANO by iontophoresis or MesoLift by electroporation.
- 5 BIOZYM-PEELING**
Item No. 9132 can à 250 ml
For gentle, deep cleansing of the skin, dead skin cells are removed gently (but thoroughly). Biological Ferment peeling, and its effect is based on the proteolytic effect of fruit enzymes contained in this preparation. Aim of treatment: cleaning and smoothing the skin surface. Suitable for normal, oily and combination skin (also blemished skin). Caution with extremely sensitive skin.
Application: powder mix to a paste with water and the foamy mass thinly applied with a brush on the face, neck and décolleté. Keep warm and humid, for example, using the IONTO HERB Steamer. Dosing spoon is included.
- 6 AKTIVE-CREME**
Item No. 9022 can à 50 ml
Fat-free special cream with regenerating, firming and germicidal effect. Suitable for all skin types, especially recommended for normal, oily and blemished skin with large pores.
Application: with IONTO-GALVANO polarity change (+) and (-) retractable.

THERMO SCULPTING

This special thermo sculpting concept from care&BEAUTY enables an improved absorption of concentrated active ingredients into the deeper layers of the epidermis when applied to the skin. The plaster mask creates a so-called occlusive effect. This means there is a controlled sealing of the stratum corneum on the outside and a pleasant development of heat on the customers' application area.

The ensuing occlusive effect offers several advantages, such as i.e. increased circulation and an opening of the pores, which enables the effective absorption of active ingredients. Especially with problem skin, the warmth improves the discharge of sebum from the sebaceous glands. Furthermore, a so-called maceration (steeping) occurs, which delays the TEWL (trans epidermal water loss).

The result is that the horny cells can increasingly absorb the skin's own moisture, whereby wrinkles are smoothed. The modelling is especially suitable for normal, atrophic and blemish-prone skin.

Application:

1. Apply care&BEAUTY thermo SERUM to the face and neckline and massage it into the skin gently.
2. Unfold a care&BEAUTY thermo BASE, cut holes for the nose and mouth and lay the entire mask on the face.
WARNING: Never use the mask without the care&BEAUTY Thermo BASE!
3. Mix a pouch of care&BEAUTY Thermo Mask with 50 ml cold or lukewarm water until it makes a smooth paste. Then spread the paste generously on the face and neckline evenly with a spatula.
4. After 10 - 20 minutes, simply remove the hard plaster mask from the face with the gauze. Use the care&BEAUTY Thermo Cream to finish.

1 care&BEAUTY thermo SET

Item No. 8227.010

Set included:

- Item No. 8227.011 thermo MASK, 10 pieces
 - Item No. 8227.012 thermo SERUM, 50 ml
 - Item No. 8227.013 thermo CREME, 50 ml
 - Item No. 8227.014 thermo BASE, 10 pieces
- Sufficient for 10 applications

2 care&BEAUTY thermo MASK

Item No. 8227.011 10 pieces à 100 g

Warming plaster mask to aid the transport of nutrients to deeper skin layers with its occlusive effect.

Application: Apply care&BEAUTY thermo SERUM to face and décolletage and massage in gently. Unfold the care&BEAUTY thermo BASE, cut holes for the nose and mouth, cover eyes with cotton pads and place gauze over the face. Mix a sachet of care&BEAUTY thermo mask with 50 ml cold or lukewarm water and stir to a smooth paste. Then spread the paste evenly over the face and décolletage using a spatula. After 10 - 20 minutes simply remove the solid plaster mask from the face using the gauze. Finally apply care&BEAUTY thermo finishing crème. **CAUTION:** Never apply the mask without the care&BEAUTY thermo BASE! For professional use only.

3 care&BEAUTY thermo SERUM

Item No. 8227.012 50 ml

Rich, pleasantly oily nutritional serum; absorbs into skin immediately and promotes regeneration and stimulation of skin; for soft, smooth looking skin with immediate firming effect; protects the skin from external influences and helps it to gain greater elasticity and firmness. Application: Serves as nutritional serum underneath the care&BEAUTY thermo mask. Apply the serum to face and décolletage and massage in gently. Paraben-free.

4 care&BEAUTY thermo CREME

Item No. 8227.013 50 ml

Intensive and immediate moisturising care with highly concentrated hyaluronic acid, for an optimum skin finish after thermo enhancing; reduces loss of fluids and preserves the water film on the skin's surface. Paraben-free. Application: Serves as finishing care after the care&BEAUTY thermo mask. Apply the crème to face and décolletage and massage in gently.

5 care&BEAUTY thermo BASE

Item No. 8227.014 10 pieces

Gauze sponges / gauze, 100 % cotton, non-sterile, 10 x 10 cm, folded 8 ply. Application: To cover the face under the thermal enhancer care&BEAUTY thermo.

CLEANSING

6 care&BEAUTY Cleansing Foam

Item No. 9025 200 ml

For a naturally gentle and pore-deep cleansing. Thoroughly removes traces of make-up and reduces tightness of the skin with moisturising and gently nourishing active ingredients. Thanks to the anti-inflammatory properties of Bisabolol, this pleasantly fragrant foam is suitable for all skin types. It is particularly recommended for dry, sensitive and combination skin.

For a perfect cleansing result we recommend using the cleansing foam alongside the care&BEAUTY face lotion.

7 care&BEAUTY Toner

Item No. 9024 200 ml

Revitalising, gently clearing tonic with moisturising effect. Thoroughly cleanses the skin of traces of impurities and suitably prepares it for subsequent after-care. The particularly mild, pleasantly fragrant formula refreshes the skin and provides it with sufficient moisture thanks to the addition of witch hazel. Suitable for all skin types, particularly recommended for blemished skin. For a perfect cleansing result we recommend using the face lotion alongside the care&BEAUTY cleansing foam.

General Terms and Conditions

§ 1 General - Scope

1. Definitions

Consumers for the purpose of the present Terms and Conditions are natural persons not deemed to practice commercial or self-employed activity with whom a business relationship is entered into.

Contractors for the purpose of the present Terms and Conditions are natural persons or legal entities or partnerships having legal capacity with whom a business relationship is entered into who were acting in the capacity of one practicing a commercial or self-employed activity at the time a legal transaction was concluded.

Customers for the purpose of the present Terms and Conditions are both Contractors as well as Consumers.

User for the purpose of the present Terms and Conditions is IONTO Health & Beauty GmbH, Greschbachstrasse 3, 76229 Karlsruhe.

2. The respectively current version of the present Terms and Conditions apply to all present and future business relationships between the User and Customers. They apply to all particulars provided in conjunction hereto in brochures, price lists, advertisements, etc., and apply regardless of whether said particulars were provided verbally, in writing, by fax or via internet.

3. Deviating, conflicting or supplementary Terms and Conditions shall not constitute an integral part of the contract, even given knowledge thereof, unless the User expressly affirms the validity of same in writing.

4. The User is entitled to modify these Terms and Conditions at any time and effective from that point in time forward.

§ 2 Contract conclusion

1. User offers are non-binding unless otherwise subject to another written agreement. The right to make reasonable technical modifications as well as reasonable changes in form, color and/or weight is reserved.

2. By placing an order for merchandise, the Customer declares a binding intent to purchase said ordered merchandise.

The User may accept the contractual offer inherent in the order within a period of two weeks from receipt of same. Acceptance is declared to the Customer either in writing or by delivery of the merchandise.

3. Should the Consumer order merchandise electronically, the User will promptly confirm receipt of the order. Confirmation of receipt does not constitute a binding acceptance of the order. The confirmation of receipt may be coupled with the declaration of acceptance.

4. Contract conclusion ensues conditional to the proper and timely delivery of merchandise by the User's suppliers. This applies solely to cases of nondelivery not being attributable to the User. The Customer shall be informed immediately about any unavailability of service. Any valuable consideration already made will be immediately refunded.

5. Should the Consumer order merchandise electronically, the User shall save the contract text and, upon request, send same to the Customer by email together with the present Terms and Conditions.

6. Changes to a concluded contract must be made in writing. This stipulation also applies to any revocation of the present written form provision.

7. Distance contracts pursuant Sec. 312 of the German Civil Code (BGB): should a Consumer place an order by catalogue, letter, email or telephone, said Consumer can return the merchandise within a term of 14 days for a refund of the purchase price. Only merchandise in new and whole condition in its original packaging will be accepted for return. If the Customer has negligently or willfully damaged the merchandise, the Customer will be liable for damages. Returns are to be sent by the most economical means of shipment.

8. Secs. 454 BGB and 455 BGB do not apply.

§ 3 Retention of title

1. With respect to Consumer contracts, we retain title to the merchandise until the purchase price has been paid in full. With respect to Contractor contracts, the User retains title to the merchandise until all claims ensuing from an ongoing business relationship have been settled in full.

2. The Customer is under obligation to treat the merchandise with care. Should maintenance or service be necessary, the Customer is to routinely perform same at Customer's own expense. The Customer is likewise under obligation to inform the User of any change of residence or place of business respectively.

3. Should the value of the collateral ceded the User exceed receivables by an amount totaling more than 20%, the User is obligated upon Customer request to release an amount of the collateral value exceeding the due receivables at the Customer's discretion of up to a limit of 120%.

4. The Customer is under obligation to promptly inform the User of any thirdparty access to the merchandise, for instance cases of levies, as well as any and all cases of damage or destruction to the merchandise.

5. Upon Customer actions contrary to the contractual terms, in particular delayed payment or infraction of a duty pur-

suant clause 4 of the present provision, the User is entitled to withdraw from the contract and reclaim the merchandise.

6. The Customer is entitled to resell the merchandise in the duly proper course of business. The Customer hereby cedes to the User all receivables in the amount of the invoice accruing from resale to a third party. The User accepts said assignment. Subsequent this assignment, the Contractor is authorized to collect the receivables. The User retains the right to collect said receivables itself should the Contractor fall into arrears by not duly discharging his payment obligations. Should the Contractor be wholly or partly in default on one or more payments, stops any payment, or initiates insolvency proceedings on its assets, said Contractor is then no longer entitled to disposition of the retained goods. The User is then entitled to withdraw from the contract, reclaim the retained goods or revoke the authorization given the Customer to collect receivables from resales, as well as demand information on the recipients of the retained goods and indicate to same the transfer of corresponding claims as well as collect such receivables itself. The User is entitled to dispose of any recovered goods in a manner in accordance with its own best judgment. Should further processing occur, the User remains the manufacturer in the sense of Sec. 950 BGB.

7. Neither the assertion of retention of title nor the garnishing of the article of sale by the User shall be deemed to constitute a withdrawal from the contract.

§ 4 Right of revocation and merchandise return

The Customer has a right of revocation according to § 355 BGB (German Civil Code).

§ 5 Remuneration

1. The purchase price as offered is binding. Value added/sales tax for Consumers is included in the purchase price. In regard to all other aspects, the product (net) price as offered does not include shipping or insurance costs nor transaction fees or taxes; these costs will be invoiced separately.

2. The User reserves the right to adjust prices accordingly in the event of changes in exchange rates, custom duties, taxes, freight or insurance costs or acquisition costs having an effect on future business.

3. With respect to Contractor contracts, the User is also entitled to change prices subsequent contract conclusion should the cost factors relevant to formulating prices have changed demonstrably or the User's supplier has demonstrably increased prices.

4. Should nothing to the contrary be agreed upon, the price pursuant the respectively valid price list of the User (list price) on the day of delivery shall apply.

5. In accordance with the purchase contract, the Customer is obliged to pay the agreed purchase price to the User and to take delivery of the purchased items. Should the Customer refuse the acceptance prior to delivery, for reasons for which the User is not responsible, or withdraws unjustified from the contract prior to delivery, the Customer has, if the User not insists on fulfillment of the contract, to pay 25% of the agreed gross purchase price to compensate for lost profits and for costs incurred unless the Customer can render proof that no damage or considerably less damage than the fixed value has been caused. The User reserves the right to request the compensation for all damages incurred instead of request fulfillment of the contract or the fixed value.

§ 6 Terms of payment

1. Provided no other agreements have been made, the purchase price as well as other remuneration, prices for additional service(s) and any advanced disbursement(s) become due upon delivery of the object of purchase.

2. The Customer can pay the purchase price by invoice. The User is not obligated to accept checks or bank drafts. Should same be accepted, they are accepted only as conditional payment. A Customer purchase discount is only permitted when payment in full is received by the User within the prescribed period.

3. The User reserves the right to withhold deliveries and/or services in the event of payment delays on the part of the Customer until payment in full of any outstanding receivables has been made as well as the right to charge interest on arrears or demand compensation for other losses incurred by the User as a result of said arrears.

4. The Customer may only exercise a right of lien when the Customer's counterclaim derives from the same contractual relationship.

5. The Customer is not entitled to offset counterclaims against the User should said counterclaims not be uncontested or legally binding.

6. Should the Customer have misled the User as to its creditworthiness when placing an order and/or should such information have not been provided, and should such a circumstance not have been evident to the User, the User may withdraw from the contract without additional respite. Should such circumstances arise after the placing of an order, the User is then only obligated to further performance given reasonable installment payment on the account.

7. While in arrears, the Consumer is to pay interest on its debt at a rate of five (5) percentage points over the current base lending rate. Contractors are to pay interest on debt while in arrears of eight (8) percentage points over the base rate.

§ 7 Delivery

1. Delivery times as agreed upon are only approximate. Stipulated terms of delivery do not come into force until the Customer has fulfilled any given duty of cooperation.

2. The User is entitled to make partial deliveries. The location to which deliveries will be made is indicated on the order confirmation. The merchandise will be delivered in customary packaging appropriate for normal shipping. In the event of default of acceptance, the Customer shall bear all costs related thereto, in particular storage and hourly labor costs.

3. Unless otherwise agreed, the User reserves the right to select the route and means of transport. In principle, all deliveries ensue ex warehouse as well as at the expense and risk of the Customer. The Customer also bears the transport risk should the User pay the shipping costs in exceptional cases. Merchandise can be insured for expense reimbursement against damage in transport. Should the Customer be the Consumer, the risk of incidental loss or degradation of the purchased merchandise in case of mail-order purchase likewise does not pass to the Customer until delivery of the article.

4. Delivery terms remains equivalent should the Customer be in delay of acceptance. 5. Used equipment and equipment acquired from the online auction can only be delivered domestically.

§ 8 Warranty

1. When the Customer is a Contractor, the remedying of defective merchandise shall be at the User's discretion in terms of rectification of defects or replacement within a reasonable amount of time. All articles and products which are specified separately by unit price in an invoice/order confirmation are deemed independent articles to which any warranty rights apply separately.

2. When the Customer is a Consumer, the following procedure for remedying defective merchandise is then stipulated in consideration of the economic interests of the User: for products valued at less than EUR 500, the Consumer may only initially request replacement. Should the value of the purchased article exceed EUR 500, the User is initially entitled to attempt to remedy the defect within a reasonable amount of time. A reasonable amount of time for the remedying of a defect is defined as 20 business days. Should remedy not be economically judicious, supplementary performance shall ensue by means of a replacement.

3. Should the supplementary performance fall short, it is essentially at the Customer's discretion as to whether to reduce the remuneration or request cancellation of the contract. However, given only a minor breach of contract, in particular only minor defects, the Customer is not entitled to the right of withdrawal.

4. Contractors are required to promptly indicate obvious defects to the User in writing, no later, however, than two weeks commencing from receipt of the merchandise; in the absence of such notification, any warranty claims are excluded. Timely dispatch is sufficient to be in compliance with the term. The Contractor shall assume the full burden of proof for all conditions of entitlement, in particular for the defect itself, for the time said defect was identified, and for the timeliness of the defect notification.

Consumers must notify the User of an obvious defect in writing within a period of two months subsequent the point in time at which the merchandise was identified to be in a condition in breach of the contract terms. The User's receipt of the notification shall be deemed definitive relative compliance with the term. Should the Consumer fail to provide such notification, warranty rights expire two months subsequent the Consumer's identification of the defect. This does not apply in the event of User bad faith. The Consumer bears the burden of proof for the time point of identifying the defect. Should the Consumer have been induced to purchase the article by reason of unfounded manufacturer statements, the Consumer bears the burden of proof for his purchase decision. The Consumer bears the burden of proof for defectiveness of used goods.

In the event of complaints which upon User inspection reveals none of the represented defects or those which are related to operating errors or improper handling by the Customer, the Customer shall be liable for reimbursement of all costs incurred by the User in analyzing the alleged defect.

5. Should the Customer desire cancellation of the contract based on a title or material defect subsequent a failed supplementary performance, said Customer shall not be entitled to make any additional claim for damages respective the defect.

Should the Customer desire payment of damages subsequent a failed supplementary performance, the merchan-

dise is to remain with the Customer when reasonable. The payment of damages is limited to the difference between the purchase price and the value of the defective piece. This does not apply should the User have acted maliciously in breaching the contract.

6. The warranty period for Contractors amounts to one year commencing from delivery of the merchandise. Excluded from this warranty are articles delivered as used merchandise and explicitly sold as used articles. The User is not liable for typical wear marks and/or wear and tear or other malfunctions or limitations of expected serviceability due to age. Claims for supplementary delivery are excluded.

The warranty period for Consumers amounts to two years commencing from delivery of the merchandise. The period of limitation on used goods amounts to one year commencing upon delivery of the merchandise. This does not apply if the Customer did not indicate the defect in due time (Clause 4 of this provision).

7. Should the Customer be a Contractor, the manufacturer's product specification is deemed solely indicative of the condition of the merchandise. Public statements, promotions, commercial or representative samples or advertisements made by the manufacturer do not constitute additional contractual indication of merchandise condition.

8. The User does not grant Customers warranties in the legal sense. Manufacturer warranties hereby remain unaffected.

§ 9 Limitations of liability

1. User's liability in cases of simple negligence of duty is limited to the average direct damage foreseeable under a contract typical for the given type of merchandise. This also applies in cases of simple negligence of duty on the part of our legal representatives or vicarious agents.

Applicable to Contractors.
2.1 In cases of simple negligence of duty, the User shall only be liable for breach of (material) contractual duties as well as bodily injury and pursuant the product liability law. In all other respects, the User's pre-contractual, contractual and non-contractual liability is limited to malicious intent and gross negligence, whereby said limitation of liability also applies to negligence on the part of the User's legal representatives or vicarious agents.

2.2 Provided material contractual obligations are not breached with gross negligence or malicious intent, User's liability for losses incurred (including indirect loss) is limited to the typically average foreseeable damage at the time of contract conclusion and the extent per case of loss and series of successional damages pursuant the order value. All additional rights and claims, regardless of legal ground, are excluded, in particular compensation for indirect damage such as lost profit.

2.3 Liability is excluded insofar as any losses which may have been incurred could have been prevented by the Customer performing reasonable measures to minimize damage.

3. The preceding limitations of liability do not apply to Customer product liability claims. The limitations of liability further do not apply to bodily injury or damage to the health or the loss of life of the Customer attributable to the User.

4. Customer claims for damages based on a defect become time-barred one year subsequent delivery of the merchandise. This does not apply in demonstrable cases of User bad faith.

§ 10 Final provisions

1. The present General Terms and Conditions are governed by the laws of the Federal Republic of Germany. Neither the UN convention on the International Sales of Goods nor any other international law shall apply.

2. Should the Customer be a merchantiser, legal entity of public law or separate public estate, the sole and exclusive venue for any and all disputes arising from this contract is the User's registered place of business. The same applies should the Customer not have a general place of jurisdiction in Germany or an unknown residence or habitual stay at the time the complaint is lodged. The User reserves the right to file actions at the Customer's main headquarters. Place of performance is the User's registered office in Karlsruhe.

3. Customer data is subject to electronic data processing within the scope of order processing. The User will heed the provisions of the Federal Data Protection Act when making use of personal data.

4. Should any individual provision of the contract with the Customer including the present General Terms and Conditions be or become invalid in whole or in part, the validity of the remaining provisions shall not thereby be affected. The entire or partially invalid regulation shall be replaced by a regulation which comes closest to the economic intent of the invalid regulation.
